

Chickies placed his chip into the programming slot.
typed 100110, thinking, this is my own, with my konkrete settings - I have tested the standard chip, and I want more - 25,50,100,175,300%, on top of my natural size I am able to surpass girls with much larger breasts than mine "
message "chip 12520: settings 100110 added"
this is the beginning of the story of Chickies, uploaded earlier.
As promised, grew her breasts and the sex adventure continues here:

Holiday

Throughout the week she played with her new ability, looks forward to a vacation with Bob. Friday Bob picked her up, she had only packed a small bag when he commented that she smiled, it's XXXL T-shirts and my remotes. He said, well, I also have my here and put the remote in the middle of the car.

The weather was rainy and cold, but they planned to have food for all 14 days that they planned to stay indoors most of the time. They stopped at a grocery store to buy supplies; they took their goods and came to the box. Bob was waiting to pay, suddenly he could feel his cock grow, and he saw Chickie stands with a remote control, while he could see her breasts grow in her shirt. They stretched out violently so the opening between the buttons. He thought, "how much did only my dick, it's crazy tight and I cannot get an erection now. at the time flew the first button through the room, her blouse began to rip, she looked at him with a mocking smile, he could feel his cock fill up, crawl down along his right leg .. "I'd better hurry out", well, finally he came to the counter, the girl looked skeptically at his legs, bump along the leg was clearly visible, he paid, "keep exchange money, he said, "and at the next pop from Chickis blouse he ran out. Chickies tits were already at least five times its size, how many steps you gave me?, he asked, laughing, she replied with an innocent smile: three steps , 12 "is the smallest dick in this week" and I do not think I would be less than 2 liters until the end of next week. In the car her shirt gave up, flopped her tits free. She put her head on his lap, fished his 12 "cock out as she began to lick and pull his head in her mouth, she said" run "ten minutes later he drove up to the cottage, he could hardly concentrate on driving, and his cock was as hard as ever.

Inside the house she said: "I want feel it grows in me, you may decide my growth. She had already given themselves three press on the remote, which is able to take his 12", she was so wet that it slid into at once, and immediately he felt the familiar tingling when she added the size of his cock. She stopped at 20 "with a small extension of the head, this way it was possible for them to fuck with an extreme sense, with blow on 15", even without the head coming out. As they both had come, she said, "gosh I needed that!" Now it's time to grow. She took his remote, he took her remote control, they looked at each other, in unison they said, "Go", he felt a tremendous source when she pressed five times more remote, his cock grow like a snake down to the floor, he concentrated about not getting an erection yet, she on the other hand, felt her breasts grow, she tried to guess the size, but lost track of his handling of the two remote controls, she was sure that she passed the cubic she had tried in advance . "I wonder where the limit is".

She leaned against the front door, and saw that her breasts now lay on the floor and still grew up at eye level, "Wait," she said, otherwise I cannot see you. He stood before her, said: "It looks great and you can tell me a little while" his penis came from the other side of the room, and forced itself between her breasts again. "Aha," let's give it a couple more so. " Cock wedged their way under her breasts and she felt, to her surprise the pressure

between her legs, the diameter was huge, impossible to get onboard, but she sat down gently so her wet entrance rested on top of it gently rubbed her forth and back on top of the head. This erect penis got to the wall and he was pressed up against the wall behind him.

The feeling of her movements and her breasts are pressed around the rest of his cock was too much, he came

They agreed to reset the project for this day, and get some sleep.

More programming, and more room.

Next morning when she woke up she saw him sitting at his computer, with programming adapter in front of him. "What are you doing" she asked - he replied: "I've made a change on the remote so we can climb reduction" so you do not need to have 10% the day after "(her breasts were still huge after the night before)" Moreover, I tried a little more drastic modification chip that can make your pubic bone more open, we must of course try a little cautious, you would not want to brake to pieces. "

She put now notice that he sat with his cock lying in front of himself under the table, apparently he had not reduced, even without an erection was over a meter. Beside her stood his remote.

He did not notice that while he was concentrating on his computer he grew longer again. He handed her a piece of plaster with a chip, it works best under your skin, but maybe it must be programmed again, so for now you can try it placed just above the pubic bone. It had to arch your pubic bone, to give more space.

She took the patch, pushed it into place just in front of the pubic bone. "How is it programmed?" She asked, "Well, I've put a matrix into which doubles each time, but it works to soften, stretch the cells, and then lock them in the new form, conversely, there are a minus button that goes the other way softens reduces, locks again. "

She took the remote, pressed +, after a short time a strange warm feeling she could see the area with the patch expands quite easy to stop again, and now with a cooling sensation, she now pressed + one more time, it repeated itself heat, stretch, cold.

She looked at him, I think I'm ready, her eyes sparkled - but I think we should wait a little before you can try with the desmi there! Only now he noticed that his cock stretched five feet in front of him. She stood with his remote, pressed cancel, and a number of times the + and while she sat on top of it while it reduced the size as was harder and harder. After a few minutes reached it down to 25 "thick as a pole, 5" longer and thicker than she had taken it in before, she sat in front of his dick between them, "now" she whispered, stood up, placed, with completely straight leg the front entrance, and pushed it in, with some difficulty, but inside it came. She looked down, her legs were slightly bent, and among them was his cock, "Nearly a third leg" she said. the new remote she pressed twice + took his old shook three times at + g, took his remote control and pressed also three times on the first, he started to grow longer, while the pressure inside her grew, so did the heat, the stretch , the cold, now she was straddled with completely straight legs while his cock slowly but surely grew farther up into her, her belly bulging out so but clearly could see that it was approaching her ribs from his position he could see his cock, thicker than her legs stretching up into her, it was an amazing sight, her clitoris bristled and juices ran down the shaft, she took his remote, pressed c +, her belly bulging a little more out. She looked very focused out grabbed the same three remotes, probed again on all of them, he saw her belly grow dangerously, almost as if she was pregnant. She had increased her pubic bone at least once more, and raised both his length and resin head size. Her body was shaken

by an orgasm with spasms he had never experienced before, his 70 "cock pushed far up into her skirt, head larger than a football, she fainted and was hanging limply on top of his pole ...

Breakfast.

He hurried to reduce its size, still rock hard from the amazing experience, she lay on the bed, he was desperate, he could not call for help with her in that state, gigantic breasts and a pussy that could take a bowling ball ... he took all the remotes he could find and normalized all settings, with the updated removal operation, he managed to get her breasts quickly into "normal" size again.

Slow she regained consciousness, shook his head and said .. "Fantastic, I am looking forward to next time and next time we must ensure that you get release. And we must find out where the limit is, maybe we can reach the head is so big that it just might be inside me, between the ribs and pubic bone. "

He tried to figure out how long he would be if the head was so big, the result was that it actually was as she had earlier described as a Desmi.

"We need something to eat first" was her only comment as she got up and went into the kitchen.

While they ate, they agreed that it was his turn to try how far he could reach, they had seen around. 140" the first evening, but there was enough space. She sat with his remote control and said ... "OK, concentrate on not being tough, quietly grew dick over the edge of the chair, down to the floor and began to form a pile has become just as thick as the first evening but still soft and pliable .. "Just a moment," she said, still he could not see anything on the table, but it felt as if something pressed up against the table. He discovered that the entire space between the table and chair was occupied with his cock which was now more than 8 "thick at the root, and even seemed to increase the thickness. She opened the door, he noticed a change in temperature. "Ok we are ready to continue, concentrate on not being tough," she said, pouring another cup of coffee up to him, sat with his remote control and a determined gaze. The table was now lifted up his cock, still only 8 "at the root but much thicker farther out.

"OK, now I pull it out at full length, enjoy it," she said, she jumped into the next room grabbed his head and pulled it all the way through to the bathroom at least 4 feet, she took the shower and sprayed hot water on the sensitive head, the reward was immediate, his head grew and was pushed further out in the bathroom as he was hard, a meter in diameter was upside down, she saw that his cock was trapped by two doorways, and the head still grew. . in the kitchen he sat with the remote, he increased the size of the head until it was almost twice the size, in fact he fucked a cottage, and she was locked in the bathroom with his gigantic dickhead

She found it difficult to do anything but rub up against his head and took his own remotes, and thought, let's see if he can get him to come by giving him a titfuck, her breasts, she increased to the same size as the cock head, simply could not be larger in the bathroom, she rubbed her breasts against his head, put a nipple into the slit, and finally he came with a splash that sprayed directly into her mouth. face, now we know that space is the limit for how much we can grow.

Later they lay side by side, her breasts football size, his cock 20 ", and rested after a long intercourse. "Tomorrow we will try how big your head may be, inside me, sleep tight"

Coherence.

Next morning he woke up realizing that she had his cock inside his mouth, his cock was still 20 ", so her mouth was well distended, as he quickly became very hard, she laid so he could reach for her pussy, it was dark so he did not see clearly, but his hand told him that she had been preparing for something big, the lips were huge, after a very slight pressure slipped his entire forearm in, she moaned "more", he could see her pubic sprung up, so her generally flat front was a big curve. "How many times have you pressed +?" He asked. Not an answer, just a plop when her mouth got off his dick.

"OK, sit in front of me," he sat down with slightly spread legs, she with her legs over his. Now he could see that her lips were very long, up to the big curve formed her stomach she grabbed his cock and took it in, while she lined right up to him. Now he sat with his cock deep inside her.

She said with her eyes closed. "Now you just increase the size, I'm ready." He took his remote control, probed + g, again and again, each time he waited for the increase was stopped, after a couple of times, they were pushed a bit apart "continue until I say stop," she said again and again, eventually they were pushed far away, his diameter at the base was not over 8 ", but in her it was a different matter, he guessed 14" when she said "wait, it becomes boring for you, we sit two feet apart, you cannot reach me" he was afraid that she would stop but she just wanted to raise size her breasts so he could reach them," she quickly dialed on its remotes, until he easily had a nipple in the mouth . He started again growth, this time tightening it briefly, but it loosened while there was a little hot, "again", he thought, and again tightened the inside of her, she moaned "this is just that the length of the head may be inside now, try to increase its size one step, only the head! While she said it she pressed both her remotes up to max A fierce rumblings sounded, her breasts grew out past him on both sides, he got an amazing sight to his dick ended up going into her, her lips stretched beyond a 22 "shaft that clearly ended in her stomach was stretched to the limit. However, the vision of him as her breasts closed around him again, they came simply on the walls of both sides, they sat at opposite ends, with his cock connecting them and breasts filled the room, and she had apparently fainted again.

His remote, he luckily had in the hand, but when he pressed-g she moaned "no, I want more", doubting he pushed + g again, "one more, she moaned" he pressed + g, the pressure was enormous, and he came with a overwhelming force, his cock pumped sperm into her, and when they ended close dented she just again.

This episode ends.

The week went by with various experiments, but they both agreed that it was the best experience when she filled out the bedroom completely (and he filled her completely). But most lovely it was to fuck with a cock at 20 to 25" it could get inside to the root, and breasts in pumpkin size. Both slight larger at the climax.

home, he dropped her off at her apartment, "See you tomorrow at the office". "Next time we have to rent something like a gym," she said as she closed the door.
