Chapter Two: The fun begins

After Jason awoke from his blackout, he found himself back in the lab.

"mhm, what happened to me?" Jason said, not remembering much just prior to passing out.

"You passed out after I told you we have to fill all the Lifepods with our babies. You hit your head pretty hard so I gave you some medicine to prevent you from getting a headache." Venus politely replied.

It was all coming back to Jason. Thinking clearly now, he had some questions, BIG questions.

"Why on Earth do we need so many babies?" Jason asked.

"Well, the plan was to store the babies in cryostasis during our space travel, so that once we arrive back home, the population could quickly rebound back to normal." she replied.

"Ok, fair enough. Now the bigger question is, how are we gonna make millions of babies? Even to fill a fraction of those pods it's going to take millions of years." he said.

"Great question! I'm glad you asked because that's what I was just about to get to." she said excitedly. Almost too excitedly.

"While we wait for the ship to resupply, we have time to experiment" Venus said with a devious grin.

"Experiment what exactly?" he asked.

"Well, with the nanobots, we can change pretty much anything about our bodies. However, the extent of their application on the reproduction system was never fully researched because it was considered taboo." Venus said.

"But after doing some research of my own over the past hundreds of years, I found that the nanobots are fully capable of completely overhauling the female human reproductive system to become highly efficient and maintain a much higher capacity. Here, come look." she continued as she waved for Jason to come over.

"Here is the normal female on the left, and the modified one on the right." Venus said as she pointed to the female computer models.

“What do you mean? I can’t tell a difference.” Jason said as he looked at two identical models.

“Exactly, you would never be able to tell because it’s all under the hood. The model on the right has three main modifications. First off, the standard womb capacity and egg count average was increased to 5. And this is just the beginning. These changes have never been tested with the nanobots so we are going to start ‘slowly’.” Venus said.

“Another important modification was body elasticity, especially in the skin. Many of the simulations I ran where I increased the womb capacity led to the skin being a big point of failure. So this new and improved skin has much higher elasticity. It now comfortably stretches to around 50 times its resting surface area. And overall, the body is much more durable, willing to stretch and move organs to make room for the babies.” she continued.

“Last but not least, efficiency. The normal human gestation period is around 40 weeks, and like you said at this rate it would take us eons to fill those pods. So instead, I maximized the efficiency to decrease the gestation period to just 2 weeks!” Venus said with emphasis.

“Holy shit! Two weeks? That’s insane. How is the body going to be able to keep up with that?” Jason asked, astounded.

“Well actually, I found the food generator in the kitchen can produce highly nutrient-dense smoothies that pretty much give the body everything it needs to have a healthy pregnancy” she replied.

“Wow, I’m impressed. You really thought this all out very well.”

“I did have a few hundred years to figure this all out so. Plus, not having any parents, I’ve always wanted to have kids to see what it’s like to have a family” Venus said, slightly blushing and putting her platinum hair behind her ear.

“Yeah, I know the feeling.” he replied. He knew all too well the feeling of being alone. Jason interrupted his thoughts to prevent reminiscing.

“So uh, are you ready to get the injection for these changes?” Jason asked.

“Oh, yeah about that...” she said as she slowly walked towards Jason.

“I’ve already given myself the shot a long time ago. I’ve just been waiting for you to put it to test” Venus said as she now was right up to Jason, looking up at him with a longing in her eyes. She had been waiting for this moment all her life.

Jason was caught off guard by her sudden advances. It also didn’t help that he was a virgin, which made him extremely nervous. So he tried to make some excuses.

“Shouldn’t we wait for my changes to take effect before we start?” Jason asked with trepidation.

“We could, but I really want to try out my modifications, don’t you?” Venus sexily replied. She backed away slightly so that Jason could get a full view. Then, she slowly started to pull her pants down her firm thighs. Jason could feel his erection hardening quickly now. Venus knew exactly what effect she was having on him and that only motivated her even more. She was extremely excited and it was showing, as her small nipples poked through her scrubs.

“So, what do you say master? Want to start experimenting?” Venus said as she slowly took off her top to reveal her perky B-cup breast and tapered waist.

Seeing her in all of her naked glory, Jason couldn’t hold himself back any longer.

“Alright, let’s experiment”.

After getting her master’s permission, Venus quickly closed the distance and pounced on Jason, grabbing his head, wrapping her legs around his waist, and bringing him in for a deep, long kiss. Jason was completely caught off guard by her eagerness and stumbled back till they rested against one of the hospital beds. The kiss was a little awkward at first as they were inexperienced, but slowly over time they warmed up and got into a rhythm, moving together as one, tongues intertwined. All the while, Venus was grinding against Jason’s groin, feeling his erection teasing her soaking wet pussy.

Venus couldn’t wait any longer, so she broke off their deep kiss. Sticking her tongue out, a long string of saliva still connected them and slowly fell down to her perky chest. Then, she dismounted Jason and pushed him on his back on the hospital bed. With Jason on his back, she climbed up the bed and began unbuckling Jason’s belt. When she finally got his pants down, Jason’s penis popped up at attention.

“Mhmhm we can work with this for sure.” Venus said, looking down at Jason’s average 5-inch penis. She then leaned over and spit on his penis, then began rubbing it down and grinding against his thighs. Meanwhile, Jason was in heaven. It felt so much better for someone to touch him instead of himself, especially when they were this good.

“How are you so good at this?” Jason asked, surprised at her apparent extensive sexual knowledge.

“Oh let’s just say I’ve been doing my research on the internet while I’ve been waiting” Venus said, biting her lip.

Shortly after, Venus was ready to go. She brought herself forward and steadied herself over his penis with her arms. Little by little, she lowered herself down onto Jason’s spear. Inch by inch she slowly lowered herself. Then suddenly, Jason felt a pop as he bottomed out on her and broke her hymen.

“Oohhhhh” Venus moaned out in a mixture of pleasure and pain.

“Are you ok?” Jason asked, seeing Venus wincing in pain.

“Yesss I’m good I just needed a second” Venus said as she slowly started moving again.

After getting adjusted, Venus quickly increased her pace and showed no sign of slowing down. Jason had never felt anything like it in his entire life. She was so tight yet so soft. He could feel each individual muscle within her squeezing and coercing his penis to let out his sacred semen. Jason could tell, Venus' body didn't just want babies, it NEEDED them to survive. And it would do anything in its power to get what it wanted. After only a minute, Venus stopped again and moaned so loud they could probably hear her back on Earth.

“UUUUGGGhhhhnnnnNNNnn” Venus moaned, this time, clearly out of pleasure.

If her pussy was gripping Jason's penis before, now it had it in a choke hold as her pussy clamped down and rippled with contractions as her body twitched in pleasure. After short-circuiting for a second, she slowly came back to reality, breathing hard.

“Oh.... my.... God” Venus said in between breaths.

“What? Is something wrong?” Jason asked out of concern.

“What's wrong is why hasn't anybody told me sex feels THIS GOOD!” Venus said as she began bouncing again, throwing her head back, and facing the ceiling.

Although he had not come yet (Surprisingly), Jason experienced the most pleasure he ever had in his life. So much so that time seemed to slow down. He watched in slow motion as Venus rode his dick like there was no tomorrow. Her platinum hair whipped and thrashed each way, her perky breast jiggled with each bounce, her toned thighs and ass cheeks rippled with each impact. And it was all his. Jason hardly couldn't believe the sight before his eyes. He also couldn't last any longer. So, Jason reached up and grabbed Venus' firm thighs and planted her on his groin, holding her down as he released his sperm.

“AHHHHHNNNGGGGG” They both moaned out in unison as they climaxed together.

Load after load, Jason unleashed into Venus' greedy pussy, which easily drank up each drop. After what felt like an eternity it all stopped and Venus fell down, laying on Jason's chest. They both lay there a while, soaking in the moment. After a minute, Jason broke the silence.

“That was amazing”

"You can say that again. I have a feeling we will have no problems making enough babies" Venus replied as she looked up to Jason with a cute grin on her face.

"Do you think you got pregnant?" he asked.

"Mhm, I don't know. Let's go see!" Venus said excitedly as she hopped off of Jason and pranced over to the scanning station to begin her scan. After the scan, they both walked over to the monitor and eagerly waited for the results. After what felt like forever, the results finally appeared.

"Pregnant with 6 babies!" They both screamed at the same time. They both turned to each other and went in for a celebratory kiss. After a while, they finally broke apart.

"Eeekk I'm so excited! These 6 will be the first of many, many more to come" Venus cheered with joy as she looked down and rubbed her belly.

"I'm so happy for you! How is that even possible though? I thought you could only hold 5 babies?" Jason asked.

"Oh yeah I made the average amount of babies to be 5, so I guess we just got lucky." Venus replied with her signature cute smile.

"Mhmmh I can't wait to see them! Master thank you so much for this!" Venus continued as she gave Jason a warm hug.

"It's Jason and of course, anything for you." Jason replied with a cute smile of his own.

And so the lovey-dovey couple was happy with their first batch of babies to come. After they cleaned up their mess in the lab, the pair happily made their way out of the lab together.

"Oh wait! I almost forgot. Let me get you your wristband" Venus interjected as she turned around and rushed back into the lab. She grabbed a wristband from one of the drawers and brought it to the computer to get it activated.

"And that should do it. Here you go." Venus said as she put Jason's wristband on. The wristband had a simple display and looked like any old smartwatch. But this smartwatch had some special capabilities.

"This wristband now gives you complete access to the ship and all the equipment. Also by pressing the green button on the screen, you have a direct line to me. So I can teleport to you anytime you need me. Then when you want to come to the ship yourself, you just press the blue button right there." Venus said as she pointed to the button on the screen.

“Sweet! Thanks, Venus” he said.

“Of course anything for you, master – I mean – Jason. Sorry! Calling you Jason is going to take some getting used to” she said as she looked down with embarrassment.

“No, it's ok. You can call me master if you want. It bothered me at first but now I don't really mind.”

“Really!? Aw, thank you, master!” Venus said as she reached up to him to give him a kiss on the cheek.

“No problem. So what now?” Jason asked.

“Well, you have about a month for your changes to take effect, and the ship will take even longer. So it's just the waiting game now” she replied

“What about my life back on Earth? What should I do about that?” he asked.

“Oh, I'm not sure. You can do whatever you want really. The ship resupplies automatically with bots so you don't have to do anything here.”

“Ok good to know. I guess I can just stay here with you.” he said

“Yay! I'd love to get to spend more time with you! But are you sure there isn't anything you want to take care of back on Earth?” Venus asked. After a moment of thought, Jason had an idea.

“Oh, you know what? There is something I need to take care of.” Jason realized.

“What is it?” Venus asked.

“Oh don't you worry, I'll show you. First, you need to show me exactly how this thing works.” Jason said as he raised up the mind control spray bottle.

After getting a quick tutorial on the mind control spray, Jason explained to Venus who he planned to use it on. His boss. He gave her the entire backstory about how Hugh mistreated him and he was surprised to see Venus visibly get upset despite not even knowing the guy. Fair enough though, he is pretty unlikable. So, after getting the backstory, they crafted a plan to get revenge tomorrow morning at work. However, they were so busy scheming up their evil plan that Jason didn't realize how long it had been since he got teleported.

“Wait! What time is it?” he asked.

"According to my watch is 6:24 a.m. back on Earth. Why?" Venus asked with a quizzical look on her face.

"SHIT! I HAVE WORK IN 5 MINUTES!" Jason exclaimed.

"Oh no! Hurry let's get you ready!" Venus said as she led them back to the teleporter.

Once they got to the teleporter, they beamed down into Jason's house. Venus helped Jason get on a new pair of clothes that didn't reek of cum and sweat. Once he was ready, he bolted out the door to make it on time.

"Alright, you can hang out here till I get back. I'll see you later!" Jason said on his way out the door

"Wait! Jason come back!" Venus shouted.

"What is it?"

"Here take these. They're caffeine pills I grabbed on our way out of the lab. Should help you last the rest of the day" Venus said as she handed Jason two pills.

"Thanks, Venus! Wish me luck!" Jason said as he kissed her goodbye.

"Good luck master!" Venus replied as she waved to him goodbye.

Jason then hopped in his car and sped off to work. As he left, he watched Venus blow him a kiss from his front door. Man, how his life changed in one day. He went from being the most unlucky guy in the world to winning the lottery. He then looked down at the seat next to him to see the small spray bottle. This day was probably the best day of his life so far, and it was about to get even better.

Although Jason did live very close to his work, he didn't live that close. So even though he gunned it, he still was about 5 minutes late, arriving there at 6:35. He parked his car and rushed inside. He was praying that Hugh hadn't made it there yet, as part of his plan required him to get there before his boss did. Thankfully, his lucky streak continued and today was one of the rare days Hugh didn't come in super early, probably because he was up late with his hookers again. So Jason took his chance and enacted part one of his plan: put the mind control spray in Hugh's coffee.

See, every morning Hugh required that a personal hot pot of coffee was made in his office every morning. Since Jason usually got there early, Hugh gave that responsibility to him. So doing his duties, Jason went into Hugh's office and made his coffee like normal. However this time, he added a few sprays of the mind control spray into the coffee. According to Venus, all you need is physical contact with the spray for it to work, whether it's on your skin or in your mouth. So now

the trap was set. All he had to do was wait for old chubby Hugh to come wobbling in the door. And wouldn't you know it, the man himself walked in as ugly and offputting as ever.

"Mornin' maggot" Hugh said with his nasty morning voice.

"Morning Mr. Heffner. Made your coffee as usual." Jason replied.

"Good, I need some of that. I was up real late last night having fun. If you know what I mean" Hugh said as he winked at Jason.

"Oh yeah? Who did you have over this time?" Jason asked, trying to act casual as Hugh sat down and poured out a cup of joe.

"Well, not that it's any of your business but I'll have you know that I recently got a raise from corporate and decided to splurge a little bit on myself and got the best of the best. Good old Cupcake, and man was she worth it." Hugh replied.

Cupcake was a famous stripper in their town, known for having the biggest ass in town, which Jason agreed was nice, but she was a tramp otherwise. Flat as a board (a big deal breaker for Jason), and honestly needed a bag on her head but that was just Jason's opinion, he would never say that to anyone.

Nevertheless, after blowing on his coffee a couple of times to cool it down, Hugh finally took a sip of his coffee. Jason could feel his heart beating out of his chest. He felt like he was robbing a bank, the vault being his boss' mind. Jason eagerly waited on the tip of his toes for the drug to take effect. And wouldn't you know it, Hugh's eyes glazed over and he sat perfectly still in silence. Jason couldn't believe it so he decided to double-check to make sure the drug worked. He waved his hand in front of Hugh's lifeless eyes. No response. He then slapped his face. No response.

"Holy shit it worked" Jason said in complete shock.

But Jason didn't have time to joke around, he was on the clock. Venus told him he had around one minute to make suggestions before the other person came back. Beep. Jason set the timer on his wristband to one minute.

"Ok alright here goes nothing. Hugh, you will now do anything that I say. Also, you now believe that I am the best employee here and you will only treat me with total respect and admiration." Jason said, now on to the good stuff.

"You also have a bad habit of using a pacifier like a little baby all the time. You also will only wear clothes that are way too small for you so everyone can look in disgust at your fat, hairy body. And you know what, fuck it. You now talk like an anime cat girl too." Jason continued just

as he heard a beep from his watch signaling the trance was wearing off. And just like clockwork, suddenly Hugh came back, but this wasn't Hugh. This was a completely different beast.

"NYAA!" Hugh screamed in a high-pitched voice, or at least high-pitched for a man like him.

"WHAT THE FUCK?" Jason screamed as he got jumpscared.

"This is so nyat uwu. Why am I wearwing zeez disgushing, beeg cloffes? And where's naye pacifier!?" Hugh said as he started to suck on his thumb and look around for his pacifier.

"Oh no... I think I might have overdone this." Jason said regretfully.

"Oh, I deedn't knyow you were here. Hi Jason Senpai! uwu" Hugh said in his 'cute' girl voice.

"Senpai?? Alright yeah that's enough. Please tell me this has an undo button." Jason said as he lifted the coffee cup back up to Hugh's lips.

"Here take a sip of this" Jason said.

"Of course! Anyfing for you Senpai! Nyaa!" Hugh said as he took the cup and took a big gulp of the coffee. Shortly after, his eyes glazed back over and he sat still with his thumb still in his mouth.

"You will no longer talk like an anime cat girl. You will talk normally now" Jason said, then waited for Hugh to come back, not whatever that monstrosity was. After a minute, Hugh started sucking on his thumb again as he came back to reality.

"Oh hi, Jason! Good morning!" Hugh said in his normal, raspy voice.

"Thank god. I don't know how much longer I could have handled that." Jason said.

"Handled what?" Hugh asked.

"Never mind don't worry about it." Jason replied.

"Ok! Whatever you say bestie" Hugh said.

"Bestie? You and me? Besties??" Jason asked surprised.

"Of course! I've always called you bestie. I call you bestie because you're my best employee. Don't you remember how shocked I was at your amazing first lab report?" Hugh replied politely.

"Oh yeah. I guess I just forgot" Jason replied, surprised at his own handiwork and how effective this spray was. That lab report was years ago and he somehow remembered it. But not only that

but also the spray somehow influenced his memories to fit his new beliefs. Interesting. Jason would have to look into that some more.

"No worries bestie. Happens to the best of us!" Hugh said as he kept on sucking his thumb fiercely. Hugh then looked down and had a realization, again.

"Oh my god! What am I wearing!?" Hugh asked looking at his own clothes.

"That's your normal clothes. What's wrong with them?" Jason replied, playing dumb to see how Hugh would react.

"No no no. This is not gonna work. I never wear clothes this big." Hugh said as he got up and threw off his shirt to reveal his jungle of a hairy chest and massive beer belly. Jason was caught completely off guard and immediately looked away in disgust. He honestly thought these changes would be funny but so far they have just been annoying and disgusting.

"I thought I had some extras back here." Hugh said as he started going through one of his drawers.

"Ah! Here we go" Hugh said as he tried to put on what looked like a kid's shirt, stretching it over his belly and barely fitting his arms in.

"There we go. Much better." Hugh said looking down at himself in approval. The shirt barely covered his man boobs and looked like it was holding on for dear life. Poor shirt. Jason finally looked back and still didn't like what he saw but at least there was something there to shield his view.

"Oh yeah, Jason I forgot to tell you. Corporate sent over a new recruit to help you out in your lab. I tried to stop Corporate from sending them, but I don't have any idea why. You already work way too hard for how much you are paid. You deserve the help. And I don't know why I waited this long but I'm also gonna give you a big raise." Hugh said to Jason as he started to type on his computer. Of course, Hugh tried to stop corporate from sending help. Typical Hugh. And a raise, about damn time, not that it matters anymore.

"Alright, there we go. Just doubled your salary and decreased your hours to 20 a week!" Hugh said as he entered the changes on his computer.

"Actually I want to come in whenever I like" Jason said, wanting to test his control of Hugh some more.

"Of course bestie! Anything you need, I got you!" Hugh replied, going back to sucking on his thumb.

"Ok good, also I want you to call me master from now on" Jason said, testing the limits.

"Of course master! Anything else?"

"Give me ten jumping jacks as well." Jason said, enjoying his newfound authority.

"No problem! One, two, three—Oh SHIT, Cramp!" Hugh said as he fell down and grabbed his calf.

"Get up rat! Was that ten?!" Jason shouted, channeling his pent-up anger.

"Sir yes, sir master!" Hugh said, struggling to get up. Jason was finally starting to enjoy himself as he watched Hugh struggle to finish only 10 jumping jacks.

"And ten... phew" Hugh said as he collapsed on his chair, struggling to breathe. Jason laughed but he had enough fun already. It seemed if he did one more jumping jack he might've had a heart attack.

"Oh by the way, I wanted to tell you sorry about delaying giving you a raise and trying to stop getting you some help. I don't know what I was thinking all this time. I guess I was just jealous." Hugh replied.

Suddenly they heard the door to the building open behind them.

"Oh and speak of the devil, that should be her." Hugh said.

"Her? The recruit?" Jason asked.

"Yeah graduated top of her class or something like that. I never read the email." Hugh replied as he started sucking on his thumb again.

As soon as he said that, the girl walked in.

"Hey is this Hugh Heffner's office?" the girl asked.

"Yes, it is. Your Felecia right?" Hugh said as he took his thumb out of his mouth.

"Haha, close but it's actually Celina. Celina Simmons. Nice to meet you." she replied as she walked over to shake Hugh's hand, only to be surprised to see his rotund belly, which was openly exposed to the air.

"Oh yes my apologies, Celina, it's very nice to meet you as well." Hugh said as he gave her a long look down and shook her hand a little too long.

Celina was clearly getting a little uncomfortable. But honestly, even Jason couldn't blame him. This was no girl. This was a woman. And honestly, she put Cupcake to shame. She waltzed in

at around 5'9", just a smidge shorter than Jason's 5'11". Her height was further accentuated by her short black pencil skirt, which showed off her beautiful firm legs and thick thighs. Her wonderful legs led up to probably the best ass Jason had seen in his life. It defied gravity as the twin volleyballs stuck out from her, creating a whole shelf you could probably rest a beer on. It almost seemed fake, but Jason could just tell by the firmness of her skirt. This was no phony. This was the result of hard work and dedication, with the help of some genetics of course. Continuing upwards was her slender waist which was held tight by her cute white top. Even with her modifications, Venus stood no chance at winning this battle as Celina's waist stood at what Jason believed to be 22 inches, which in contrast made her ass only look that much bigger. Continuing upwards once more, Celina only got better as the crown jewel of her body was definitely her face. She had what Jason would describe as a perfect face. She had deep green eyes which sucked you in, cute freckles sprinkled across her petite nose, full and plump lips that begged to be kissed, and a sharp jawline that could probably cut through stone. All of that was topped with a luscious head of natural red hair which reached down to her massive bottom and cute glasses which completed the look.

"And you must be Jason, right?" Celina said as she broke away from Hugh and turned towards Jason.

Oh, you probably noticed there was one thing that was skipped over, her boobs. And sadly, boobs skipped over Celina. Being flat as a board, she didn't even need a bra. Guess it all went to her ass.

"Jason? Hello?" Celina asked again as Jason wasn't paying attention.

"Oh yes sorry, I'm Jason. Nice to meet you" Jason replied.

"Nice to meet you, Jason. I've actually really been looking forward to working with you." she said as she nervously fixed her glasses.

"Me? You were looking forward to working with me?" Jason asked surprised that some random hot nerd girl knew about him of all people.

"Yeah, in college I read a ton of your work and kinda of looked up to you." Celina said with a cute smirk as she tucked her long red hair behind her ear.

"Really? Wow, that's awesome. I had no idea anyone actually read my papers." Jason said.

"Well, I specialize in genetic modification, which is pretty niche. But in that field, I found your work to be some of the best out there."

"I'm shocked. Thanks! That means alot to me." he said. Not only was this girl a total smoke show, but she also loved his work? Jason's stomach filled with butterflies as this girl had him in a vice grip just one minute after meeting him.

"You two love birds have your fun. I'm gonna head home real quick and get some stuff" Hugh said as he wobbled out the door, sucking his thumb along the way.

"Phew, thank god he is gone. He was making me so uncomfortable. Does he always wear stuff like that and suck on his thumb?" Celina asked curiously.

"Oh yeah, he is a bit of a weirdo as you will find out." Jason laughed.

"Yeah no kidding!" Celina replied as she laughed as well.

"Don't worry about him. Just ignore him." Jason joked.

"Ok cool. So, what's on the agenda for today?" Celina asked.

"Well, would you like a tour of the facility before we start?" Jason asked Celina, his heart fluttering at the sight of her.

"From the man himself? I'd love one!" she replied with a smile.

"Alright after you, Ma'Lady" Jason said as he opened the door from Hugh's office and led her out the door, getting a great view of her glorious butt as she walked out the door. Man, Jason's day just kept getting better and better.

Meanwhile, back at Jason's place, Venus was bored so she was doing some exploring. She noted that there honestly wasn't much in the house so her expiration ran short until she made it to Jason's room. Clearly, she could see this is where Jason spent most of his time. It was nice and kind of cozy. Jason kept it clean just like his lab which made it look bigger than it honestly was. It had a bed, a few nightstands, a bookshelf, and a desk where Jason's computer was. Venus waltzed over and looked at some of the books on the bookshelf. None of them caught her eye. But she did see a picture of what appeared to be Jason's Mom and Dad, which was sitting next to two Urns with their names on it. Venus could tell Jason got most of his cute looks from his mom: her brown hair, hazel eyes, and soft features. They looked happy together. Venus hoped she and Jason could maybe be the same as them one day.

Moving on she went over to Jason's desk. Immediately, Jason's shining bright RGB keyboard caught her eye. She had never seen anything like it on her mostly white ship. She went up to touch it and see how it felt. Right when she touched the keyboard, Jason's computer started.

Venus got spooked as she initially thought she did something wrong, but quickly realized it was just turning on. Once it got booted up, Venus read a message on the screen that read "It appears your program crashed. Restoring your applications...". Venus thought it better to not

mess with Jason's stuff without his permission so she moved along to finish her tour of the room. Right as she walked past the computer, all of Jason's applications and tabs finished restoring. Abruptly, a loud sound started playing from the computer.

"Ugh, Ugh, ugh... Yes boobies keep growing bigger and bigger and bigger!" said the video playing through the speakers.

Startled, Venus quickly turned around. Once she saw the screen, her jaw dropped to the floor.

On Jason's screen were the biggest pair of tits Venus could ever imagine, and they were still growing...

"Ughhhhh yessssss don't stop" the video continued.

Venus just stood in pure awe at the sight before her. It was a 3d animated video of a woman with boobs that started as big as yoga balls and then started to grow bigger and bigger and bigger until they bust the whole house down.

"Holy shit" Venus said as the video finished with the girl's car-sized nipples pointing towards the sky.

Completely enthralled, Venus couldn't resist seeing what else was on the computer. As she went through the tabs of Jason's browser, the theme was the exact same on every single one: gigantic boobs. There were all types of boobs. Real and fake boobs on real people (which were by far smaller than the rest), giant anime boobs that smothered their entire bodies, 3d boobs that bounced and jiggled every which way, and more. The collection seemed to never end and neither did the size of the boobs. This made Venus think back to what Jason said in the lab when she asked if he wanted to change anything about her.

"Gosh, he wasn't kidding when he said he liked REALLY big tits." Venus said to herself.

Finally, Venus stumbled upon what appeared to be a forum of some sort about big boobs. Venus went to Jason's profile and read some of his posts. She saw hundreds of posts of him talking about all these girls with big boobs. He posted pictures of girls with tits the size of yoga balls saying "God, what I'd do anything in the world to make her my wife". Another post with a girl pumping out milk from her tits, easily filling an Olympic swimming pool, saying "God I wish I could be in that pool!". And so on. Clearly, Venus got the memo. Jason was a boob guy.

She sat there and thought to herself why Jason didn't change her to be like these other girls on the ship. Clearly, it was what he wanted, everything he wanted. He was obsessed. And soon, he would be obsessed with her, Venus thought to herself as she came up with a plan.

Once she came up with her plan, Venus turned off Jason's PC and put his room back the way she found it. She then tapped her wristband and beamed back up to Fortuna. Once on board,

she rushed into the lab. Before she went to the nanobot machine, she went over to the computer terminal first. She reached over and plugged herself into the computer in the port behind her ear, connecting her brain to the computer. She went to the part of her brain responsible for controlling her wants and desires. Inside was a list of her wants and desires, which had an object or activity field and a desire level, ranging from 1 to 10. There were things she couldn't (and wouldn't) change like her complete and utter devotion to her master, which was hard-wired into her. But there were also other things that naturally generated like her favorite chips, her favorite video games, and so on. All of them had varying degrees of desire level, but none of them reached anything over a 5. Nevertheless, Venus scrolled to the bottom of the long list and directly created a new entry, something she had never done before. She then typed in "big boobs" then went over and entered 10 in the desire level. She then added another entry, "Breast expansion", level 10. Then another entry, "Growing my boobs", level 10. Then another, "Gigantic breast", level 10. Then another, and another, and another. Until Venus ran out of ideas of what to type. Feeling accomplished, she scrolled back up to the top and pressed enter.

Instantly, Venus felt the changes. Her mind became filled with her boobs getting bigger and bigger. And she loved it. She then looked down at her own measly B-cup breast and felt severely lacking. So, it was time to change that. She then walked over to the nanobot machine and scanned herself. After her scan was complete, she went over to the monitor and changed a 'few' things. Looking at the new simulated model, Venus looked on in approval of her soon-to-be body. She then walked over and pressed the button on the machine to eject her syringe. After it popped out, Venus grabbed it and raised it to her arm.

"Master wants some big tits? Oh, I'll give you some big tits." Venus said to herself as she injected herself, soaking in the feeling of the nanobots streaming into her bloodstream. She dropped the syringe and brought her hands up to her belly.

"Don't worry babies. Mommy is going to have plenty of milk for you" Venus said smiling with pure joy as she happily rubbed her belly.
