

Chapter 4: Pumpkin patch

"Where are you taking me?" Celina asked as Jason led her out to behind the lab, a place where no one would see them.

"Ok, this should do," Jason said as he felt they were in a private place.

"Uh, this is just the back of the lab though. What's so special about this?" Celina asked.

"We are back here because I wanted somewhere private outside. And it's not where we are now that's special, it's where we are going. But first, I need to go over two things with you first" he replied

"Ok, hit me"

"Alright, first of all, I need you to have an open mind. What I'm about to show you might seem really weird at first. But if you keep an open mind about things, I feel like you of all people will find it interesting. Last thing and most important thing: you must not tell anyone about what I'm about to show you." Jason said.

"Ok I can do that no problem" she replied.

"No, I mean it. Don't tell ANYONE. Not your parents, siblings, friends, or pets. Nobody. You got it?" Jason said sternly.

"I swear! I won't tell anyone. I promise" she said.

"OK good. Alright, with that out of the way, take my hand" Jason said as he grabbed Celina's hand.

'Well, here goes nothing' Jason thought to himself as he pressed the teleport button on his wristband.

Within a blink of an eye, Celina found the back of the lab had transformed into a metal tube.

"Welcome aboard" Jason said as he walked through the teleporter door, revealing the ship to Celina.

Celina was speechless. 'I must be dreaming again' Celina thought as she pinched her arm. Yep, not dreaming. Celina found herself aboard a futuristic spaceship that was straight out of a science fiction movie. Yet here she was, walking on the polished white floors and overlooking the earth through the window of the ship.

"Where are we?" Celina asked in awe.

"This, is Fortuna, a state-of-the-art interstellar spaceship from an Alien civilization in our galaxy." Jason replied.

"Haha, you're joking. This can't be real."

"Oh, it most certainly is. Here watch." Jason said as he went over to one of the monitors and turned off the artificial gravity.

"WOAH!!" Celina said in surprise as she lifted off the ground.

"Feel real now?" Jason said as he 'swam' towards Celina.

"Yes! This is amazing! How did you find this place?" she asked.

"Well, actually this place found me. Turns out, I'm a one in 50 billion genetic anomaly." Jason said as he turned the gravity back on with his wristband.

"What's so different about you?" Celina asked

"Well, I think it might be better if I show you. Here, let me show you the coolest room on the ship." Jason said as he led Celina into the lab.

Meanwhile, back in the kitchen, Venus had just finished her 5-gallon shake.

"Phew, that was a little harder than last time" Venus said as she patted her new, expanded belly.

Last time, her belly was about the size of a really big watermelon. This time, however, she had graduated from the watermelon category to the prize-winning pumpkin category. Her rotund, bulging belly stuck out nearly two feet from her, filled with almost 10 gallons of nutrients and water. It was so big that her cantaloupe breasts were pushed upwards towards her face, obscuring her view.

All of it made Venus extremely horny as she fingered herself in the kitchen, struggling to reach around her massive stomach.

"Mhm, yessss! I can't wait for you girls to get so much bigger. Master is going to go crazy when he sees how much you guys have grown!" Venus moaned as she raised on hand to grope her soft breasts.

Venus pleased herself with a vengeance as she desperately waited for the nanobots to get to work. However, Venus was so distracted that she failed to hear the teleporter go off...

After 30 minutes, she finally reached her 6th climax, imagining her boobs filling the entire kitchen and overflowing into the main area. Slowly coming back from orgasm, Venus looked down to see nothing had changed yet. She still didn't feel any pressure in her breasts.

"Ugh, come on! What's taking so long?" Venus questioned because by now she should be feeling the pressure in her breasts.

"Maybe I need to drink more of the smoothie" Venus thought to herself as she walked over to the food generator to make another smoothie.

Just as she was about to order her drink, Venus heard something.

She heard footsteps coming towards her and voices. A man AND a woman's voice.

"Master is back already?!" she said in disbelief.

Venus looked down to see her gravid, nude body, glistening with sweat and dripping in pussy juices. She heard the footsteps coming closer now. She started to panic. Master seeing her like this is one thing. But this new girl that master was so crazy about? There was no way. This was not the first impression Venus wanted to make. So, she darted her eyes back and forth, looking for a possible escape to at least make herself more presentable. However, there was only one exit and entrance to the kitchen, which was where they were coming from. So, at the last second, she went with her only option: the closet. Venus quickly squeezed into the cramped closet and shut the door. Venus and her belly barely fit into the tall, square closet as she felt herself being slightly pushed in on all sides. Nevertheless, she let out a big sigh of relief. Just seconds later, she heard the pair walk into the kitchen.

But then, Venus' eyes went wide as felt a small gurgle in her stomach.

Meanwhile, back at the lab, Jason had given Celina the entire rundown. He told her about how he got here, why the ship was here, and the changes that were made to his body using the nanobots. However, Jason failed to mention a few details, like why he brought Celina in the first place. He didn't get tell her because they were distracted by the nanobots, which quickly became the only topic of interest as Celina absolutely geeked out them.

"These are simply unbelievable! And from what it sounds like, their genetic modification abilities haven't even been fully utilized. With some slight modifications, these could seriously do anything!" Celina exclaimed.

"I know right? I told you this was going to be your favorite room." Jason replied.

"Yeah, I'm going to move into this room. Just get me a bed right here and that's all I'll need! Haha" Celina joked.

"Haha, you and me both! We can come back and mess with the nanobots later. But first, there's still the entire rest of the ship I have to show you!" Jason replied

"Oh yeah! Sorry. Just a little excited about the nanobots if you can't tell"

"Oh really? I couldn't tell." Jason replied as they both laughed.

"I'm starving by the way. Do you want to see the kitchen next?" Jason asked.

"Sure! I didn't eat breakfast so I'm starving as well" she replied as they left the lab and headed for the kitchen.

The pair finally made their way to the large, empty kitchen. There wasn't a single piece of food in sight.

"Where's all the food?" Celina asked.

"Oh boy, do I have a surprise for you." Jason said as they walked over to the food generator. On their way over, Jason nearly tripped on a little cleaning bot that was slowly cleaning up what looked like clear slime on the ground. Jason decided to ignore it and made his way to the generator.

"Get this. This is a food generator that can make you any food you want with the tap of a button." Jason explained.

"You're lying." Celina said in disbelief

"Nope, give it a shot."

"There's no way" Celina said as she ordered a large chicken Caesar salad. The machine rumbled to work and out came her perfect salad. Celina gawked.

"Told you" Jason said as he ordered his burger and fries.

Celina reached down and took a bite just to make sure it was real.

"Mhm, this is so good! Can this ship get any better?!" Celina exclaimed.

"There's also an Olympic-sized swimming pool by the way" Jason added as he grabbed his burger.

“Alright that does it. When can I move in?” Celina asked.

“Actually, sadly we ran out of space and can’t except any new residents” Jason joked as he gestured to the empty spaceship.

“No, I’m serious. When can I move in?” Celina asked as they sat down with their food.

“Oh, you weren’t joking.” Jason said surprised at her sudden serious tone.

“No, I’m not joking. This ship is everything I’ve ever dreamed of I haven’t even seen all of it yet!” she said with excitement.

“Well, in that case, I guess I can tell you the real reason why I brought you here” Jason said.

“Tell me. I don’t care what it is. I’ll do it. I’ll do anything to be here with you” Celina interrupted in eagerness.

“Anything?” Jason asked.

“A-N-Y-T-H-I-N-G” Celina said, emphasizing each letter.

“Alright if you say so.” Jason said as he took a deep, nervous breath.

“Remember when I told you to keep an open mind before we came here?” Jason asked

“Yes, and?”

“And you remember why this ship is here?” he continued

“To gather materials, and for you to repopulate the alien planet, right?” she replied.

“Yes, that’s right. However, I did leave out one small detail about that” Jason nervously added on.

“What?”

“Well, the thing is, I have to make a lot of babies, and by a lot, I mean a shit load of babies”

“Ok and?” Celina asked, sitting on the edge of her seat in anticipation.

“Well, I was wondering if you-”

“I’ll do it.” Celina interrupted.

“Do what?”

“I’ll do it. I’ll have your babies. That’s what you were going to ask right?”

“Yes, but I don’t think you understand how big of a commitment this is,” Jason said, surprised at her sudden commitment.

“I don’t care. I’ll have all the babies you could ever ask for. I’m all in on this. I don’t have anything to live for back at home anyways.” she said.

“You don’t?”

“Yeah not really. My family abandoned me when I was 16. I don’t have any siblings. I haven’t talked to any of my friends since high school. And the only thing I have at home is my cat.” Celina explained. ‘Sounds a lot like me’ Jason thought to himself.

“So, you are sure you want to do this? You do you understand you will have to throw away your life on Earth and never tell anyone about this.” Jason added on just to make sure she understood what this deal entailed.

“I already told you, I’m all in on this. I was already convinced after seeing the lab, but now you are saying I get to research AND have sex all day with YOU? Baby, just show me the dotted line” Celina sexily said as she got up and bent down to give Jason a kiss.

Right before their lips met, they heard a loud moan come from somewhere in the kitchen. Both of their eyes turned to the closet as they saw the door moving slightly...

Back in the closet, the rumbling had begun. All of a sudden, the gurgle in Venus' stomach quickly escalated as the nanobots finally got to work at the worst time. Venus was helpless as she felt the familiar feeling of the pressure in her breasts return. Despite the situation, Venus reveled in it as she desperately rubbed her sensitive boobs. The pressure in her boobs climbed and climbed, as did Venus' pleasure as she covered her mouth to suppress her throaty moans. However, unlike last time, the pressure didn't stop growing. Supplied with much more resources, the nanobots worked even faster than last time. As a result, the pressure kept building and building until Venus felt like she was going to burst. Steadily, she felt her stomach begin to shrink and her melons slowly start to rise as she could hear more and more materials being pumped into her breasts. Venus felt them expand and grow into her hands, feeling their supple mass begin to overflow her fingers. As they grew larger and larger, Venus couldn't reach her arms around them anymore as her arms were pushed into the closet walls. She resorted to the next best thing. She fingered her pussy with one hand and perilously attempted to cover her moans with the other. The soft, pillowy dough rose further and further off her chest, propped up by her massive belly. As they entered watermelon status, Venus could hardly contain her

pleasure any longer. Her self-implemented dreams were coming true and soon her master would never be able to resist her. No other girl would ever compete with her ever again.

Without warning, Venus felt a shot of pleasure shoot down her spine. Her extremely sensitive, finger-sized nipples finally met with the cold, metal closet door. The unexpected feeling sent Venus into overdrive as she let out a loud moan through her fingers. Venus began to stumble in pleasure as she felt her huge nipples graze over the cold surface. Slowly, more and more boob flesh pressed into the door causing it to slowly open. Countless orgasms shot through Venus' electric brain causing it to get overloaded. Soon, the pleasure became too much as Venus felt herself losing consciousness. She finally lost her balance and stumbled out of the closet. She fell on her back, completely lost in her world of pleasure as she fondled her still-growing tits.

"Oh my god!" Celina shouted seeing Venus fall out of the closet.

Celina and Jason immediately ran over to see if she was okay. When they stumbled upon her, Jason quickly knelt down to check on her. When he did, they found she was more than just 'OK'. Initially, Venus' expression could have been confused with a look of pain. But seeing her fondling her massive boobs, it was obviously not a look of pain, but pleasure. Realizing Venus wasn't hurt, both Celina and Jason didn't move, paralyzed by the sight of the swaying, jiggling pair of pumpkin-sized boobs. They stuck out over a foot from her body and perfectly sat on Venus' chest, propped up by her shrunken basketball-sized belly. Somehow, her tits seemed to defy gravity, mostly maintaining their perfectly round shape as Venus lay on her back. She was completely lost in her world of pleasure as she continued to masturbate, oblivious to her surroundings.

Meanwhile, Celina and Jason found themselves both getting turned on by Venus. However, besides simply arousing them, Venus' expanded body had a more profound impact on the two. For Jason it was simple: all his dreams of massive boobs were coming true right in front of him. While he didn't know how or why her boobs were so much bigger than he set them to be, he was extremely happy they were as he pitched an obvious tent. For Celina however, things were a bit more complicated. At first, she was put off by the extremely erotic sight. However, as Celina watched Venus' boobs ripple and sway, a feeling rose from deep inside Celina. That feeling was a yearning, a yearning she suppressed for a long time.

Celina was never happy with her body. She was especially embarrassed by her lack of breasts. While all the other girls' boobs grew, Celina's mounds remained dormant, leaving her with a feeling of lack. So to compensate, she decided to put all her effort into her ass. Over years of working out, she perfected her butt. But it just never was the same. There was something about breasts that made them so special to Celina that not all the ass in the world could make up for having boobs. So, in the end, she still woke up every day to look down to see and feel nothing. Moreover, that feeling of lack never went away. In fact, it only got worse with time. Eventually, as Celina got older, her desire for breasts grew so much that she found herself booking an

appointment with a plastic surgeon. But as she looked at the pricing options, Celina was rudely reminded that she was just a broke college student. And so, Celina's desires were left unfulfilled. In response, Celina suppressed her feelings, leading them to take a deeper and deeper root in her heart, whether she knew it or not.

So as she stood there staring at Venus' voluptuous body, all of those feelings she suppressed for so many years rose right to the top. Unconsciously she raised her hands up to start rubbing her chest, wishing that she was this goddess in front of her; wishing that those boobs were hers. But then, Celina looked over to see Jason, who was slowly grinding against Venus with the most lustful, happy look on his face. Celina had never seen Jason look at her like that. Instantly, Celina's longing to be Venus soured into deep, raw envy and jealousy. Immediately, Celina interrupted them as she couldn't bare seeing Jason continue to pleasure himself with this random whore any longer.

"What the hell is going on? Who is this?" Celina loudly interrupted, causing Jason and Venus to slowly come back to reality.

"Oh, sorry Celina. This is Venus, she is a android from the alien planet that brought me here" he responded, surprised by her harsh tone.

"hi Celina, nice to meet you" Venus awkwardly added as she lay naked on the floor.

"An android? But she's a human?" Celina asked, ignoring Venus.

"Actually, I am almost entirely human except for my brain which is an electronic computer." Venus replied with a smile.

"Okay. But that still doesn't explain what the hell is going on with you. Like why are your tits and belly so fat?" Celina harshly replied again.

After saying that, Venus finally paid attention to the girl who was so rudely addressing her. Immediately, Venus noted her lack in the bosom department. Additionally, she noted the look of disgust on Celina's face as she looked at Venus' chest. As a result, Venus took a disliking to this jealous, anti-boob crusader. She would have to deal with her later...

"Well actually, my boobs are this 'fat' because master wanted them to be. And my belly is also 'fat' because I'm carrying master's babies." Venus replied with some attitude.

"Master!? Who are you calling master? You robot whore." Celina rudely said.

Venus then pointed to innocent Jason, dragging him into the crossfire. Jason felt the tension in the room building as Venus and Celina stared each other down, sizing up one another. Realizing this, Jason needed to stop this before things got out of hand.

“Woah woah woah! Settle down girls. Settle down. We are all friends here. I think we all just got off on the wrong foot.” Jason said attempting to douse the fire, which clearly didn’t work as they both sassily looked away from each other.

“Venus, why don’t you go put on some clothes? When you come back, we can sit down and start over again. Sound good?” Jason said.

“Mphf. Fine. You are lucky master is here. Bitch...” Venus said to Celina as she stormed off, stumbling due to her new center of gravity.

“Who does she think she is? And calling you master? What is that all about” Celina said after Venus walked away.

“Well actually, she has been a servant on this ship for over 6000 years waiting for me.” Jason replied.

“She waited 6000 years for you? Why? Because of your genetics?” Celina asked.

“Exactly. And since I’m the one meant to save her people, I’m now in charge of this ship. So naturally I became her master.”

“Oh. I see. I had no idea” Celina said as a wave of realization washed over her.

“Yeah, there’s more to people than meets the eye” Jason added on.

Celina couldn’t imagine waiting 6000 years for someone who probably didn’t exist. It gave her a new respect for Venus. Nevertheless, she was still jealous.

“I get that she is pregnant with your babies, but why are her boobs so big? Have they always been like that?” Celina asked.

“No. Actually, she used to be pretty flat.”

“You’re kidding...that girl? Flat?” Celina asked.

“Yeah, no kidding. But honestly, I didn’t know she was this big till we saw her. Earlier this morning she was about this big.” Jason said as he gestured to cantaloupe-sized breasts on his chest.

“You’re lying. That’s impossible.” Celina said in disbelief.

“Nope. That’s the power of the nanobots for you”

“The nanobots did that?” she asked.

“Yeah like I told you, the nanobots can pretty much change anything you want about your body” he replied

“Wow, that’s amazing...” Celina said as her mind started to wander.

“Oh, and speak of the devil.” Jason said, snapping Celina out of her daydream.

Venus rounded the corner wearing her usual white scrubs, however, they didn’t look so usual on her new body. Her giant, pumpkin-sized breasts strained against the fabric, lifting up her shirt to reveal most of her big belly. She embarrassingly walked over as Celina and Jason couldn’t take their eyes off her.

“Sorry, I need to make some bigger clothes. This is the biggest shirt I have” Venus said as she tried to cover her exposed body with her arms.

“It’s ok Venus. We can take care of that later. Right now, you two need to apologize to each other” Jason said to the two girls, forcing himself to look away from Venus’ mesmerizing tits.

“But Master-” Venus said but was interrupted.

“Apologize.” Jason interrupted with emphasis.

“Ugh fine. Celina, I’m sorry for being rude to you” Venus said with little emotion.

“It’s ok. I’m sorry for being rude to you as well.” Celina said.

“See, much better. Now, I don’t know why y’all were being so mean to each other. But you two better learn to get along with each other because Celina agreed to join.” Jason said.

“She did?” Venus asked.

“Yes, I did. Jason already gave me the whole spiel and I accepted.” Celina replied, resulting in a surprised Venus.

“She’s right Venus. Of course, we haven’t made it official yet but she gave me her word.” Jason added.

“Wait what do you mean ‘make it official’? Is there something I have to sign?” Celina asked.

“Oh yeah... I got so distracted by our talks about the nanobots that I forgot to tell you about the pregnancy injection.” Jason said.

“Pregnancy injection? What is that?” Celina asked.

"It's a nanobot injection Venus made to overall improve human pregnancy by decreasing the gestation period to 2 weeks, increasing body flexibility, and so on. But most importantly, it increases the average child amount to 5 per pregnancy" Jason responded.

"5 kids per pregnancy!? I know you are trying to repopulate a planet but where are you going to keep all of these kids?" Celina questioned.

"I think it would be better if I show you. Why don't we finish our tour of the ship while we are at it." Jason said as he led the group out of the main area.

After finishing their tour of the ship, which Celina was very impressed by, they arrived at the 'nursery', as Jason called it. Jason opened the door and explained that the millions of life pods would house the Valatian babies until they reached the home planet. Celina was shocked just like Jason's first time in the nursery.

"So we have to fill all of these pods without babies by the time we make it back, right?" Celina asked.

"Yep, pretty much. So, now that you really know what this all entails, are you still sure you want to do this?" Jason asked.

Jason worried that this would be too overwhelming for Celina and would scare her away. But what he didn't notice was that Celina was focused on Venus, who absent-mindedly adjusted her tiny shirt around her massive breasts. Rather than be scared away, Celina felt more sure about her decision than ever.

"Yep, I'm more sure than ever. Let's go make this official." Celina quickly replied.

"Oh wow. Okay then, let's go." Jason said surprised at her quick and confident response.

So the group made it back to the lab. Venus prepared Celina's injection and briefly told her all that the injection entailed. Celina understood and agreed to take the injection.

"Alright, this is your last chance. Are you sure this is what you want?" Jason asked Celina one more time.

"Just like I told you before, I'm all in. Let's do this." Celina said with excitement.

"Alright, here you go" Venus said as she injected Celina.

"Well, that makes it official. Welcome to the Fortuna crew Celina!" Jason said, giving Celina her wristband and a warm hug. During their hug, Celina saw Venus feeling left out.

"Come on Venus! You are part of the crew as well" Celina said as she motioned Venus to join them, which she finally did.

And so the crew was finally united. But before they could celebrate, Celina had other plans in mind.

"So now that I'm officially a part of the crew I can use the lab equipment. Right?" Celina asked.

"Of course. Why?" Jason asked.

"Well, I kind of wanted to test out the nanobots..." Celina said, shyly tucking her shiny red hair behind her ear.

"Oh, for your research? Of course! Go ahead, in fact, I'll join you. I think you were right about the nanobots. I think with some adjustments and can do so much more" Jason replied.

"Yeah totally...actually, I meant that I wanted to test them on myself." Celina said, grabbing Venus' attention as well.

"Oh. I see. Were there some changes you wanted to make to your body?" Jason asked.

"Yes, but it's so embarrassing to say out loud so I'd rather not say"

"Oh, come on. We won't judge you. What do you want to change? It can be anything." Jason said trying to comfort Celina.

"Well, I've always wanted boobs..." Celina said under her breath.

Hearing those dreamy words, Jason's penis immediately jumped to attention. Not wanting to ruin the moment, Jason awkwardly tried to calm down his roundy dog. But before he could respond, Celina continued,

"Not right now, obviously! But eventually, it would be nice..." Celina softly said, embarrassed after sharing her secret desires.

"Of course Celina. You can do whatever you want with your body. We will support you no matter what, right Venus?" Jason said looking back towards Venus who had been keenly watching this entire time.

"Right, master. I'd be happy to help you with the nanobots anytime Celina." Venus kindly responded.

"Ok cool. Thanks, guys" Celina said.

"Anytime Celina. Now, why don't we grab some food from the kitchen and head to the pool to celebrate!" Jason offered.

"Hell yeah!" Celina said leading them out of the lab.

"I think I'll need to find a new swimsuit before I can go..." Venus said causing them to laugh together as they headed off.

Despite the rough start, slowly the trio warmed up to each other. Hanging out in the pool proved to be a great bonding experience. Especially since most of the conversation centered around Venus' poorly fitting swimsuit, which barely managed to cover Venus' hand-sized areolas.

After the pool, they spent the whole day exploring the ship together and getting to know each other more. Venus talked about what she spent 6000 years on the ship doing, which was basically nothing until humans invented video games which she became obsessed with. Celina talked about all her previous boyfriends and awful college experiences. And Jason was just happy to listen to the two most beautiful girls, whom he could soon call his partners, getting along.

After a long day, they were exhausted. Celina was particularly tired as she celebrated a little too hard with the booze from the food generator. So as the night slowed down, they all said goodnight to each other and went to their own assigned bedrooms to clock out for the night. Jason went to his room with a big smile on his face. Today went better than he could ever imagined. Not only did he get Celina to join the mission, but also she got along with Venus. Jason couldn't be happier as he tucked himself into his bed for his first official night on the ship. Shortly after, he heard a knock on his door.

"Hey, can I come in?" the person at the door asked.

"Sure, come in," Jason responded to the voice at the door.

It was Venus, who looked absolutely stunning in her big white robe with her fleshly washed platinum hair which lay on top of her huge boobs. She walked over and sat on Jason's bed with him.

"Hey, I wanted to talk to you for a bit if you don't mind" Venus said

"Of course. What's up?"

"I wanted to talk to you about Celina" she said

"Oh yeah, what did you think of her?" Jason asked

“She’s great! I see why you wanted her to join so badly. I think you made the right choice”

“Thanks, I’m glad you like her too. I’m glad y’all got along so well.”

“Yeah me too. Turns out we have a lot in common which I didn’t expect from a human girl. But I couldn’t help but feel something off...” Venus said.

“What felt off? Something about Celina?”

“Yeah it’s hard to explain but I couldn’t shake the feeling that she was trying to hide something”

“Do you not trust her to keep this all a secret? She seemed pretty trustworthy to me.”

“Maybe, I’m not sure. She definitely seems passionate about all of this. But I definitely want to keep an eye on her though. And maybe keep the spray on hand because you can never be too sure...”

“Well, I still think that should be a last resort. But a deal is a deal and if worst comes to worst, you have my permission to do what you deem necessary for the mission.” Jason reluctantly added on.

“I understand. Thanks for hearing me out master.” Venus said with a smile.

“Anytime Venus, thanks for letting me know,” Jason replied, admiring his beautiful, huge-boobed servant.

“Oh and one last thing about Celina, what do you think of her as a mate?” Venus asked.

“As a mate? You mean do I find her attractive?” Jason asked

“Yeah is your attraction to her maximized to optimize reproduction rates?” Venus added.

“Well I mean yeah she is super pretty...” Jason replied with some uncertainty

“Obviously. But remember when I asked you if you wanted to change anything about me in the lab?”

“Yes and?”

“Well is there anything you wanted to change about her? Maybe something up top perhaps?” Venus said, propping up her tits to emphasize her point.

"I mean yeah. I told you I do like big boobs. So I wouldn't mind if she had more up top to balance all she has down below. Of course, I wouldn't force her to change anything. Only if she wanted to, you know?" Jason embarrassingly said.

"Ok that's what I thought. Just making sure" Venus said with a clever smile.

"And speaking of bigger boobs, what happened to you!? Your boobs are ginormous!" Jason said

"I know right? Do you like them?" Venus cutely replied, squeezing her boobs with her elbows to emphasize their new size.

"Like them? I love them! How did they get so big" Jason said as he moved closer to Venus to feel her new boobs.

"Well, I may have given myself another injection" Venus said.

"You serious?! How big did you go?" Jason asked, completely caught off guard.

"Only a little bit bigger than this. But I have to say, after having these for a day, I think I need to go even bigger..." Venus sexily said, expertly pressing all of Jason's buttons.

"Bigger? How much bigger are we talking?" Jason eagerly asked, as his erection grew in his pants.

"Way bigger! So big I can't even wrap my arms around them!" Venus passionately responded, gesturing boobs filling her lap and more. Jason couldn't believe what he was hearing. Venus seemed to want her boobs bigger just as much as he did!

"Oh my god, that's amazing! Why do you want them so big all of a sudden?" Jason curiously asked.

"Oh, well you may or may not have left all of your tabs open on your computer. And I may have accidentally turned on your computer and saw some of them..." Venus shyly replied looking downwards, waiting for her master's reaction out of the corner of her eye. Instantly, Jason's eyes went wide.

"You got on my computer!?" Jason said, suddenly raising his voice which scared Venus.

"I'm sorry master! It was a complete accident! I didn't mean to but I accidentally touched the colorful keyboard and the computer turned on. I walked away from it but I got spooked when I heard a woman's voice moaning through the speakers as her boobs grew bigger and bigger until she broke down the house" Venus pleaded with her master as she got down on her knees with tears welling up in her eyes.

Jason knew exactly what video she was talking about. It was one of his favorites and apparently, she watched the entire thing...

"Well, what did you think?" Jason calmly asked.

"Huh?" Venus said, confused at her master's sudden change in tone.

"What did you think of the video? Did you think it was weird or something?" Jason asked Venus.

"No! Not at all master, in fact, that video is what inspired me to make my boobs bigger."

"Really?" Jason asked in disbelief.

"Yes! Really master! Listen, I know you like really big boobs ok? Remember what you said at the lab?" Venus asked.

"What? That I like big boobs?" Jason questioned.

"Yes, but before that. You mentioned how you liked really, really big boobs but then you cut yourself off. I didn't really think much of it at first. But after seeing that video and the pictures on your computer, I realized that you weren't kidding when you said you liked them so big that you can't get out of bed in the morning. And so, all I wanted was to give you what you wanted!" Venus said as she started to cry.

"Venus it's okay! Please don't cry!" Jason said as he embraced the crying Venus.

"I'm sorry master! I just wanted you to love me and make you happy" Venus said through her tears.

"It's ok Venus, there's no need to apologize," Jason said, calming Venus' crocodile tears down to sniffles.

"Really? You're not mad at me for going through your stuff?" Venus asked, wiping the tears off her face.

"Of course not Venus. It's totally fine. I forgive you. I know you didn't have bad intentions." Jason said, consoling her.

"Thank you, master! I'm so glad I got a merciful master." Venus said in between her sniffles as she lept into Jason's lap.

"I just wish you told me sooner." Jason added.

"I know. I'm sorry master. I just wanted to surprise you." Venus said with a guilty look on her face.

"No, I wish you told me sooner so I could put these to use as soon as you got them" Jason flirtatiously added, as he disrobed Venus revealing her massive hangers, which rested in Jason's lap.

"Oh, don't worry master. Next time I'll let you decide how big you want me to go" Venus sexily added as she immediately caught on to Jason's game.

"Oh, I don't think that's a good idea." Jason added as he laid back on his bed.

"And why's that?" Venus said as she crawled on top of Jason's chest, her massive one-and-a-half-foot breasts hanging down like ripe fruit in front of Jason's face.

"Because, now that you know what I really like, I wouldn't hold back," Jason added as he reached up to begin squeezing Venus's pumpkin-sized orbs, eliciting a moan from Venus.

"How big would you make me? As big as the girl in that video?" Celina said as she slowly pulled down Jason's pants, revealing his throbbing dick.

"Bigger" Jason replied, as he pulled Venus' right tit down to start sucking on her hard, finger-sized nipple.

"How much bigger?" Venus asked, pressing all of Jason's boob-obsessed buttons as she started to grind against his dick.

"So much bigger you would put that girl to shame. You wouldn't even fit in this room" Jason added as he bit down on Venus' nipple.

"Yes master! Bigger! That's not big enough!" Venus said as she finally inserted Jason's throbbing erection into her drenched pussy.

"I'd make you so big we would have to keep you in the cargo room, but even then, that room would be too small soon enough," Jason added as he started to thrust into Venus' tight, needy pussy.

"YESS!!! BIGGER!!!" Venus moaned loudly as she bent over, smothering Jason with her huge, supple boobs.

"Then your babies would come in and they would make your tits even BIGGER!" Jason said, increasing his thrusting speed while grabbing as much boob flesh as he could.

“UGHHH!! YESS!! MAKE ME INTO NOTHING BUT A BABY MAKER AND TITS!” Venus said as she climaxed, gripping incredibly hard down on Jason’s erection.

Venus’ last line combined with her pulsating pussy was too much for Jason as he let out what felt like the biggest load of his life. He watched in spectacular slow motion as Venus threw her head back, causing her boobs, which looked massive on her 5’7” frame, to bounce and jiggle with joy.

After coming down from their climax, Venus looked down at Jason with her big blue eyes with what could only be a look of pure bliss.

“I love you master” Venus said in between her breaths.

“I love you too Venus” Jason replied between his breaths as well.

After he said that, Venus fell on Jason and brought him in for a deep, long kiss. Then, the two slowly drifted to sleep in each other’s arms, separated by Venus’ ginormous pillows.

While the two love birds were having the time of their life, the third passenger actually wasn’t as tired as she faked to be earlier. In fact, It was quite the opposite: she was wired. Her desire for boobs completely overrode her need for sleep. Instead of being in her room, Celina was hard at work in the lab experimenting with the nanobots, learning all the ins and outs of what made them work. Testing their limits. But she wasn’t injecting herself yet. No, not yet. Everything had to be just perfect before she made her move. And so, while the two love birds soundly slept, Celina worked late into the night as she enacted part one of her masterful plan she had been thinking of all day.
