

Chapter 5: The Trio's First Day on Fortuna

Jason woke up to a loud sound. He quickly rubbed his eyes to find the source of the disturbance. He looked over to his side to find the source of the sound: Venus' moans. Venus was desperately clawing at her breasts which had nearly doubled in size overnight, overflowing her lap.

"Ughhhh master, please! Rub them! I can't reach my nipples!" Venus pleaded with Jason to assist her with her fist-sized nipples.

SNAP

"NGGGHHH YES! BIGGER!" Venus shouted at the top of her lungs as her boobs made quick work of her shirt.

Jason just stood there in shock as her boobs, freed from their prison, began to grow even faster. They quickly rose like rising dough, easily covering the surface of the large bed and nearly reaching the roof. Despite the loud moans, Jason could hear the sound of Venus' boobs gurgling as they expanded larger and larger, filling up more and more flesh. Suddenly, Jason looked up to see the boobs had run out of headroom as they pressed against the ceiling. As her growth exponentially increased, the compression from the floor and the ceiling caused her tits to grow outward even faster. Jason was slowly forced to back away from the growing wall of soft boob flesh. Soon enough Jason was backed against the corner as Venus' boobs conquered the entire room. All Jason could see was tits, which quickly grew until they pressed against him. Initially, Jason enjoyed the soft feeling of Venus' tits pressed up on all sides of him. But without room to grow, the pressure increased rapidly as Jason was slowly squeezed to death by the things he loved the most. He tried to breathe but instantly his nose and mouth were stuffed with boob flesh. He started to panic as he struggled and gasped for air. It was all pointless against the inevitable wall of boob. Jason's vision faded to black.

Jason's eyes shot wide open to see his entire field of vision eclipsed by boobs, which slowly suffocated him. Immediately, he grabbed the huge tits and shoved them off of his face. He shot up, loudly gasping for air. All of this commotion had woke up Venus, who was soundly asleep next to Jason.

"Hey, what's going on?" Venus asked in her groggy but cute morning voice.

Jason's eyes darted over to Venus who had her normal boobs, if you could call pumpkin-sized boobs normal.

"Oh, my goodness. Thank god," Jason said in relief as he slowly started to calm down.

“What? What’s wrong master?” Venus said as she crawled over to Jason, her huge naked orbs dragging across the sheets as she did so.

“Oh it’s nothing I just had the weirdest dream,” Jason said to Venus. At first, it was a dream, then it quickly became a nightmare, one he wouldn’t forget.

“What happened?” Venus curiously asked her master, pressing her 32P cup boobs into his back.

“It was nothing. Don’t worry about it,” Jason said as he turned around to give Venus a good morning kiss.

“Mhm, ok. If you say so. You wanna know what I dreamed about?” Venus asked as she ran her finger down Jason’s chest.

“What?”

“I dreamed that I got pregnant with 6 of your kids and my boobs grew so big- Oh wait, I’m living that,” Venus sexily joked as she tackled Jason and brought him in for a deep kiss, pressing her firm boobs against Jason’s chest.

Jason responded by firmly grasping both of her giant melons. Yesterday, Jason’s big hands covered most of Venus’ boobs. Now, they barely covered a third. And they were still just as soft and pillowy as they were before. They softly received his caresses and filled the space as he moved his hands away. After kneading them for a second, Jason felt her thimble-sized nipples harden in his hands. Answering their cry for attention, Jason squeezed both of her nipples causing Venus to moan into his lips. Venus counter-attacked by beginning to grind her firm ass against Jason’s hardness. After a minute straight of kissing, Venus finally broke off, both of them gasping for air.

“Looks like someone is an early riser,” Venus said as she began to stroke Jason’s eager cock.

“I can’t help it when the sexiest girl in the world jumps on me like that,” Jason replied, peering into her blue eyes which were slightly covered by her cascading silver hair.

“Aw, thank you, master. I think you deserve a treat for being such a good master. Don’t you?” Venus said as she slithered down Jason’s torso and wrapped her boobs around his dick, engulfing it entirely.

“OH- yes, master likes this treat!” Jason said with a smile of pleasure.

“Mhm yes master likes my big titties doesn’t he?” Venus asked as she began rubbing her tits up and down Jason’s cock.

“Oh, you have no idea!” Jason said as he felt two of the softest things in the world squeeze his dick.

Years ago, before Venus knew Jason existed, Venus decided to study how humans reproduce in preparation for ‘the one’. At first, she found some guides online, but then she found porn videos, which were, unsurprisingly, much more interesting to Venus. Eventually, she became obsessed and burrowed down the rabbit hole, watching hundreds of videos and soaking up all the knowledge she could. She had seen tittyfucks hundreds of times. But never once did she imagine herself doing one or it being this hard! Venus always thought the pornstars made it look so easy in the videos. But most of them weren’t dealing with boobs bigger than their head. So, Venus tried to keep her massive melons contained around Jason’s 5-inch dick but failed miserably as her soft flesh bulged out from her arms and fingers. Nevertheless, there was so much boob that there was enough pressure to get the job done. Eventually, Venus’ got into the groove and increased her pace. Her increased pace combined with Jason’s lubricating pre-cum created an immediate response from Jason.

“Oh my god! That feels so good!” Jason moaned as he threw his head back in pleasure.

“Just wait till my boobs are even bigger. Then it will feel even better,” Venus said as she continued to rub down Jason’s length.

Like always, Venus knew how to press Jason’s buttons too well. Imaging Venus with even bigger boobs, Jason couldn’t hold it in any longer.

“I’m cumming!” Jason moaned loudly as he threw his head back against the bed.

“Yes master! Shower me in your cum!” Venus replied, immediately causing Jason’s dick to erupt.

Venus gasped as squirt after squirt of cum shot out and landed on her supple mounds. After Jason finished, he leaned up to see how sexy Venus looked covered in his cum. To his disappointment, what felt like a massive load barely looked like a few drops on Venus’ vast cleavage. However, Jason’s disappointment quickly disappeared as he watched Venus raise her boobs and lick her giant boobs clean. The entire time she had her mesmerizing blue, fuck-me eyes locked on Jason, causing his penis to twitch in delight.

“Mhm interesting,” Venus said after she cleaned her cleavage.

“What?” Jason asked.

“That was the first time I ever tasted semen before,” Venus responded.

“What did you think?” Jason asked out of curiosity.

“Definitely much more salty than I expected but I kind of liked it” Venus answered as she sensually licked her lips.

“Well, don’t you worry there’s always more where that came from,” Jason replied, causing Venus to deviously smile.

Then, Venus felt her stomach growl. Apparently, her tummy isn’t satisfied with the tiny appetizer it was given.

“Oh, looks like the babies are hungry,” Venus said as she rubbed her tummy, which had shrunk back to its slim 25-inch form overnight.

Venus was disheartened that she wasn’t showing yet. To be fair, today was only her third day being pregnant so she wasn’t even done with the first trimester of her 14-day pregnancy. She had grown accustomed to patiently waiting after 6000 years of doing so. But something about her pregnancy made her so excited that each day felt like 100 years. Nevertheless, while the days did feel long, Venus savored every moment of it. She had been dreaming of these days for as long as she could remember. So, she would persevere, until she could maybe make some changes... *gurgle*

Venus would have to worry about that later because her current pregnancy was demanding attention.

“You want to go have breakfast in the kitchen?” Jason asked, noticing her discomfort.

GURGLE She winced in pain as her stomach aggressively protested.

“Yes! Badly!” Venus said as she hopped off Jason’s bed, causing her boobs to bounce up and down beautifully.

She grabbed Jason’s hand and ran out the door towards the kitchen.

Maybe it was the babies, or maybe it was the sex. Maybe it was both. Whatever it was, Jason could feel himself and Venus slowly become more connected. Jason thought this to himself as he watched Venus lead him to the kitchen. Venus was something out of a romance manga with her luscious platinum floating in the wind, her cute, heartwarming smile, and her juicy tits rippling and jumping for joy with each step. Jason simply smiled and enjoyed the moment.

Until he painfully felt his semi-hard dick slapping against his stomach

“Wait! Venus! We need clothes!” Jason interrupted as they ran naked down the hall.

“Oh, whoops!” Venus innocently said as she turned around and led them the other way.

“Wait! I need to get my clothes too!” Jason protested as they passed his room.

“Ugh! OK, fine!” Venus said as she reluctantly let go of her master’s hand and ran into her room.

“Silly Venus” Jason chuckled to himself watching her petite little body, apart from her tits, skip into her room.

Jason went into his room and got ready. Just as he was putting his pants on, Venus was already at his door.

“Hurry! I’m starving!” Venus said as she motioned for Jason to hurry up.

Jason looked up to see Venus in her ridiculous-fitting scrubs again. From the outside, Venus looked like she was just fat. But upon further inspection, one could see just under her top that her bulging boobs were so big that they created a curtain over her toned stomach, giving the illusion of her looking fat. Jason took a moment to laugh at the obscene sight.

“Hey! Stop laughing! I haven’t made new clothes yet” Venus embarrassingly said as she tried to fix her struggling white top, her still hard nipples poking through the fabric.

Jason chuckled as he grabbed his white scrubs from the closet and began to slide them on.

“Master, please! What’s taking so long!” Venus impatiently added.

“Ok! Someone is a little hangry,” Jason said as he skipped towards the door while pulling up his pants.

“Actually, all seven of us are hangry!” Venus said, rubbing her stomach which continued to growl as they ran towards the kitchen.

When they finally made their way to the kitchen, they were surprised to see Celina was already there.

“Hey, good morning!” Celina cheerfully said to the pair.

Celina had completely taken over one of the tables. However, the table wasn’t covered with food but with papers filled with writing, indicating she had been here for a long time. The only ‘food’ Celina had was a big jug of coffee.

“Good morning. How long have you been up for?” Jason said, astonished at all the papers on the table.

"A few hours or so. Nothing crazy" Celina said as she took a big sip of her coffee.

"A few hours? What are you working on?" Jason asked as he walked over to see Celina's work.

"Actually, I've gotten started on familiarizing myself with the nanobots. These are all of the manuals and design blueprints that I printed out" Celina answered, presenting the papers to Jason.

"Wait what? Do you have access to all of those?" Venus asked, surprised.

"I guess so? Why?" Celina asked.

"You definitely don't have the clearance for that. Here, hand your wristband over. I must have given you the wrong one," Venus sternly said as she rushed forward to take the wristband from Celina.

"I didn't know. I'm sorry." Celina responded as she sadly took off her wristband and held it up to Venus.

Jason saw the look of disappointment on Celina's face, like taking candy away from a baby. So he decided to step in.

"Wait, Venus!" Jason said, grabbing Venus' arm.

"What?" Venus asked.

"She's already seen all the blueprints already so what's the point in taking away her permission to see them now? Plus, I was looking forward to experimenting with the nanobots with Celina and it would help if she knew how they work. So I think she should keep her wristband," Jason said, attempting to persuade Venus.

"Mhmmm, ok fine. She can keep her wristband," Venus said, caving for her master.

"Thank you Venus! That means a lot to me," Celina added with a smile of joy.

"BUT, don't get too excited. I have my eye on you. You better not be digging around in things you aren't supposed to. Got it?" Venus said to Celina in a strict tone, very different from her usual cheerful attitude.

"Got it. Thank you, Venus," Celina replied with a warm smile.

GURGLE

Venus' stomach loudly rumbled causing her to clutch her stomach.

“Are you ok?” Celina asked, looking at Venus with concern.

“Yes! Sorry! I just really need to get something to eat.” Venus said as she hobbled off to the food generator clutching her stomach.

Celina couldn't help but gaze as Venus' foot and a half boobs jiggled in their cloth prison as she walked away. While Celina never wanted boobs that big, one couldn't help but stare at that commanding rack as soon as she walked into the room. This includes Jason, who fondly gazed at his servant's bouncing bosom. Celina noticed the way Jason looked at her. She knew Jason liked her, but she never saw him look at her the way he looked at Venus. She then looked down to possibly find the cause of that difference: her lack of boobs. Not wanting to think about that depressing topic any longer, Celina broke the silence.

“You didn't have to do that by the way. I was completely out of my lane and should've asked for permission before I printed those documents,” Celina sadly said to Jason.

“No, don't worry about it. I know how badly you wanted to use the nanobots. And at the end of the day, I trust you so you don't have to worry about anything,” Jason kindly replied.

“I don't know, Venus seemed pretty mad about it all,” Celina said, doubting herself.

“No, don't worry about her. She was just hangry is all,” Jason replied.

“Haha, yeah I don't blame her. She does have a lot of mouths to feed.” Celina said, starting to lighten up.

“Yeah no kidding. Anywho, have you found anything interesting yet?” Jason asked, looking at some of the documents on the table.

“I didn't really find anything interesting in these blueprints or manuals. At least, nothing that we didn't already talk about. But while I was looking for all the documentation on the nanobots, I found something weird. Come look,” Celina said as she waved Jason over to look at the computer monitor.

“When I pulled up the files on the nanobots, I found some restricted folders that I don't have access to,” Celina said as she demonstrated by scanning her wristband, causing a red 'restricted access' icon to pop up on the screen.

“Interesting. I've never seen that before. I wonder if Venus knows anything about that. Venus, do you know anything about this restricted folder?” Jason asked, turning to Venus, who had just latched onto the faucet.

"Hmm?" Venus gurgled through her mouth full of water as she looked towards Jason from across the room.

"Why is this folder on the nanobots restricted?" Jason asked again.

Venus, who didn't hear what Jason said, shrugged her shoulders with her mouth full of water, then proceeded to reattach her mouth to the running faucet.

"Mhm, ok I guess it's nothing bad then," Jason said as he carelessly looked away from Venus.

"Do we not have cups?" Celina asked, pointing towards Venus, whose tits nearly dragged her into the sink.

"No, we definitely do. Pregnancy stuff I guess?" Jason said as he shrugged towards Celina.

"Definitely pregnancy stuff," Celina replied with a cute giggle.

"Anyways, I guess whatever is in here isn't that important so why don't we take a look," Jason said as he swiped his wristband, causing the red warning to go away and the folder to open.

"How did you do that?" Celina asked, surprised Jason opened it with ease.

"This is my ship so I guess I have access to everything," he responded.

"Good to know. Now, what is so special about this folder" Celina said as she leaned into the monitor to inspect the folder which contained one file.

"Mhm, looks like it's just the manual," Celina said as she opened the file and skimmed through it.

"That's weird. Why would it be restricted then?" Jason asked.

"I'm not sure- Oh wait. What's this?" Celina said pointing at the section of the screen which read 'Experimental settings' along with many warnings which cautioned the user not to use these settings.

"Experimental settings for the nanobots?" Jason exclaimed.

"I guess so. This was definitely not in the manual I printed out," Celina added as she skimmed over the document.

"Mhm I see. That's why this was restricted. What does it say though?" Jason asked as he moved closer to the screen to get a better look.

“Holy shit!” Celina burst out as she covered her mouth in shock.

“What?! What is it?” Jason said as he leaned in, intrigued by the source of her outburst.

“Look,” Celina replied as she pointed to the line which read ‘Genetic Modification’.

“Wait, this wasn’t included in the regular manual?” Jason asked.

“Nope. It never once mentioned anything about genetic modification, which is what I was looking for after you told me about the injection that changed your genetic sequence.” Celina replied as she backed away from the monitor and looked back at Jason.

Why didn’t the regular manual say anything about genetic modification if he got an injection that did so? Jason pondered for a moment. Then, it clicked.

“Oh, I see now. It all makes sense...” Jason said to himself.

“What makes sense?” Celina curiously asked.

“Venus told me when I first got on the ship that the Valatians struggled with two things when it came to innovating: Reproduction and genetics,” Jason said as he paced back and forth.

“Ok and?” Celina said, begging him to continue.

“And Venus told me that they tried to experiment with the genetic modification abilities of the nanobots. Eventually, they were able to modify only a small number of genes successfully. It was enough to be used on someone like me, who had small enough changes that the nanobots could successfully alter my genes and propagate the changes throughout my body.” Jason continued explaining.

“Ok, what exactly are you getting at?” Celina questioned.

“Well, let’s just see if my hunch is right,” Jason responded as he leaned into the monitor and scrolled down past the numerous, serious warnings.

“Bingo,” Jason said as he stepped back from the monitor.

“What did you find?” Celina asked.

“Take a look for yourself,” Jason said as he gestured Celina towards the monitor.

Celina walked back towards the screen with an uncertain but curious look on her face.

She gasped at what she saw.

Bodies of mutilated Valatians in cages filled the screen. Initially, the pictures began with some Valatians with some different kind of deformity whether it was an extra tail or longer legs. But eventually, the pictures took a very dark turn as the changes became more and more extreme. Tails were growing out of their eye sockets, massive tumors consumed their bodies, eyes were scattered across their limbs, organs were growing outside of their skin, and so on. As a scientist, Celina was absolutely petrified at the catastrophe before her. Celina slowly backed away in horror as tears started to form in her eyes.

"How could they do this?" Celina said through her tears.

"Their people were getting massacred. And desperate people do desperate things sometimes," Jason responded as he hugged Celina to comfort her.

"But this- this is borderline genocide," Celina said choking on her words as she leaned into Jason's chest.

"I know. I had a feeling this was why the document was restricted," Jason said as he brushed his hand over Celina's red hair to calm her down.

"How did it get so bad?" Celina said as she started to calm down.

"I'm not sure. It says here that these are the results of their trials to increase the number of genetic modifications above the safe baseline. Looks like they just kept trying and trying and trying. And it never worked." Jason answered as he walked back towards the screen, with a look of depression on his face.

"I see why this wasn't in the regular manual," Celina added with a look of regret.

"Yeah. And I think it should stay that way," Jason said looking at the gruesome images.

"I agree. Clearly, this is something that shouldn't be messed with," Celina said in agreement.

BURP

Venus loudly burped, causing Celina to look away from the monitor. She turned to see Venus walking towards them. Celina panicked. She just told Venus she wouldn't mess around with stuff she wasn't supposed to. And this was definitely something they weren't supposed to see. So, Celina scrambled to cover their tracks.

"Shit! She's coming! Quick! Uh- Kiss me!" Celina said as she hastily grabbed Jason's head.

"Huh-" Jason attempted to say but was cut off by Celina's soft lips.

Soon after they started kissing, Venus arrived and did not like what she was seeing. She still wasn't used to seeing her master kiss another girl.

"Ahem," Venus said, announcing her presence which caused the pair to break off their kiss.

"Oh hey Venus, you feel better now?" Celina said attempting to appease Venus.

"Yeah thanks for asking. I was just hungry. What have you guys been up to over here?" Venus said with a sarcastic tone as she suspiciously looked towards the monitor.

"Um- we were just talking about messing around with the nanobots. Yeah! Right, Jason?" Celina said hastily as she looked directly toward Jason, gesturing to him to play along. As she said that, she casually moved in front of the monitor and closed the folder behind her back.

"Uh- yeah, we were just talking about how Celina wanted to use the nanobots," Jason added, playing along.

"Really? What did you want to use the nanobots for?" Venus asked, trying to catch Celina in a lie.

Celina tried to think of an excuse but was distracted by Venus again. While her bulging belly was massive, Celina was more interested in her breasts which, being propped up by her belly, looked even bigger than when she first walked in. Celina then saw Jason in the corner of her eye. She looked over to see him giving Venus that look again. Celina then looked down at her miserable, bare chest. In doing so, the small flame of jealousy inside Celina transformed into a roaring campfire. She was losing the battle for Jason and she needed to come up with an excuse to tell Venus. So, she decided to kill two birds with one stone.

"Actually, I was just telling Jason that I think I'm ready to get some boobs now," Celina said as she sexily waltzed over to Jason.

"Really? I thought you said you wanted to wait?" Venus asked, surprised.

"I did say that, but I already made up my mind. Right, Jason?" Celina said, looking at Venus as she walked to Jason's side.

Jason didn't respond. Celina looked back to see Jason was still hyper-focused on Venus, so she decided to take it a step further. So she took a slow, subtle step in front of Jason.

"Right-" Jason tried to say but was interrupted by Celina grinding her fat ass against Jason's groin.

Celina's actions were having just the effect she hoped for. Venus' heart went ablaze seeing her master clearly enjoy Celina's treatment as he tried to suppress his moans. Venus walked

forward to interfere but was stopped in her tracks when she saw Celina stare her down as she pleased her master. Celina used this opportunity to go even further by taking Jason's hand and placing it on her plump ass. Jason mindlessly followed the gesture by firmly grasping Celina's volleyball ass cheek. All the while, Celina never took her eyes off Venus, who was flabbergasted by Celina's sudden attack. Venus thought she and Celina were better after their time hanging out yesterday. But at the end of the day, there was only one Jason to go around and she wasn't keen on sharing him. However, Venus looked to see Jason lost in his own world. Seeing this, Venus pouted in defeat and crossed her arms atop her belly, causing her boobs to bulge upwards. She may have lost this battle, but she would not lose the war.

"Well, Miss 'I want boobies now', why don't we go get those new boobs then?" Venus loudly said.

Hearing the word boobs, Jason awoke from his daze and looked up from Celina's ass.

"Right now?" Celina asked, surprised at being put on the spot.

"Yeah right now. Unless you want to keep your little mosquito bites which I don't think the master would like. Would you master?" Venus responded in her sassy tone.

"Well I mean-" Jason said but was interrupted by Celina.

"No, it's ok Jason. Let's do it right now. Come on," Celina said as she grabbed Jason's hand and led him to the lab, followed by angry Venus.

On their way to the lab, the girls were huffing and puffing the entire way. Jason didn't like that the girls were fighting again. He was going to say something like last time, but he thought it would just be best for them to get it out of their system now. And to be fair, all of this meant Celina was finally going to get bigger boobs so Jason was more than willing to let this situation run its course. Also, it felt nice to have two gorgeous women fight for your attention as well. So on second thought, Jason was actually glad the girls were fighting, as long as it didn't get out of hand.

When they got to the lab, Celina went up on the scanner for her injection. She wasn't sure if she was showing it, but she was crushed on the inside. Why would she be sad? Isn't Celina getting the boobs she always dreamed of? Well, technically yes. However, she was not getting them the way she wanted to. She knew it was as easy as pressing a button on the nanobot machine and she would get the boobs she always wanted. But what's the fun in that? No, instead, Celina wanted a challenge. She wanted to put her years of scientific studying to the test and see if she could modify her genetics to give herself bigger boobs. And after hearing about the shot Jason got, she thought her dreams could become a reality. However, upon seeing the contents of the restricted file, her dreams were crushed. It wouldn't be worth the risk. So, on the first day of her

masterful plan, everything was ruined. So, she stood there with mixed emotions as the green laser traced down her body.

"Alright, you can step down now," Venus said after Celina finished her scan.

Venus' eyes bulged when she saw Celina's measurements pop up on the screen. Besides her 30-inch bust, she had a 22-inch waist and 40-inch hips. She didn't have boobs but no wonder Jason liked her.

"What now?" Celina asked Venus.

"On the left is your current body and on the right is your new body with the simulated changes. So all you have to do is just input your changes on the sliders here and hit enter." Venus explained.

"Ok let's see here then," Celina said as she walked over to the display to make her changes.

As she walked over, she caught a wonderful view of Venus' cavernous cleavage. Immediately, this caused Celina to think big. She thought that if she were going to have to compete against Venus, she would have to be at least as big if not bigger. So, she went over to the slider and slowly increased her breasts to match Venus' pumpkin-sized melons. Then, just out of curiosity, she decided to go even bigger.

"Dang, this thing can go really big can't it?" Celina asked.

"Yep. Pretty much," Venus said in a snarky tone.

When Jason saw her continue to increase the slider beyond Venus' already impressive size, he couldn't believe his eyes. She gets the chance to change her boobs and she goes this big already!? This girl is a match made in heaven for Jason. Instantly, he found himself with a raging hard-on. It was impossible not to as the new simulated model displayed the most perfect hourglass figure Jason could imagine. Her giant beach-ball-sized tits slimmed down to a perfect trim waist which then flared out to voluptuous hips. Then, Celina rotated the model to see the rearview. When she did, her boobs were so big on her petite frame that they easily were visible from behind. The combination of her skinnier frame and bigger rear instantly put Celina over Venus in Jason's eyes. Upon seeing the new Celina, Jason awkwardly adjusted his pants as he felt a squirt of pre-cum run down his leg.

Venus, meanwhile, was not concerned with Celina's choice. Venus had the upper hand. She knew the key to Jason's heart was simply bigger boobs. So it didn't matter what size Celina selected because Venus could just go behind her and make herself bigger, making it so that Venus would always be bigger and better than Celina. Therefore, Jason would love her more.

However, Celina was having a change of heart. She didn't expect this to be the how and the when she got her boobs. But as she started to soak in the fact it was finally happening, she put some more thought into it. As much as she wanted to have bigger boobs than Venus, she was only doing it just for the sake of beating Venus. And while that would be nice, it's not what she really wanted. Plus, to Celina, those big balloons looked like more of an annoyance than anything. She couldn't even imagine what sleeping would be like with those giant melons attached to her chest. On the contrary, what she really wanted were the boobs she nearly got surgery for, the ones always dreamed of since she was a little girl. So, she went back and moved the slider way back down to around the 32DD cup breasts (small grapefruit size), which was the perfect size in her eyes. Celina looked at her new simulated body and smiled in approval. It was everything she ever wanted.

"Ok, looks good to me," Celina said as she pressed the enter button.

Both Venus and Jason were stunned at Celina's decision.

Venus was completely thrown off as she expected Celina to try to one-up her. She guessed it made sense though since Celina didn't know about Jason's obsession and there aren't many girls that share the same obsession. However, Venus was one of those girls and she was happy she was because she knew it meant Jason would be hers and hers alone. Knowing her victory was ensured, Venus relaxed and smiled as she relished in her triumph.

However, before she could relish in her victory any longer, she noticed the look on Jason's face. Jason couldn't help but admit he was disappointed with her final choice, especially compared to what she had before. While he thought he was hiding his disappointment well, it was definitely showing. Venus noticed this look of sadness in her master's eyes, and she knew the exact cause. So despite how good it felt to beat Celina, that feeling was completely overturned by that look in his eyes. If her master wasn't happy, then Venus wasn't happy. So, Venus also had a change of heart. She decided to put aside her competition with Celina and focus on making her master happy. And she knew just how to do that.

Celina then turned around to see the look of sadness on their faces. She was particularly interested in Jason, who looked like a sad puppy.

"Uh, is something wrong?" Celina asked as she quizzically looked at their shocked expressions.

"What? Oh- sorry, nothing is wrong. I think your changes look great! Right, Venus?" Jason cheerfully said, attempting to mask his disappointment.

"Of course, I think you made a great choice Celina. Those will look great on you," Venus confidently said with a smile that warmed Celina's heart.

While Celina was surprised by Venus' sudden kindness, she appreciated it nonetheless.

“Aw! Thanks Venus. I’ve always wanted boobs ever since I was a kid so this is a dream come true,” Celina said as she brushed off their sad reactions.

“Well, looks like your dream is ready,” Venus said as she grabbed the syringe that had just been dispensed.

“Are you ready?” Venus asked Celina as she brought the syringe up to Celina’s arm.

“More than I’ll ever be. Do it,” Celina confidently replied.

Getting the go-ahead, Venus injected the nanobots. Celina felt the cold fluid rush through her veins. The feeling was exhilarating, especially because she knew what that cold fluid would do to her body very soon. After a few seconds, the syringe was empty.

“And there you go,” Venus said, putting up the syringe.

“Wow that’s it?” Celina asked, surprised at how easy the whole process was.

“Yep, now it’s just the waiting game,” Jason answered.

“How long do you think it will take?” Celina asked excitedly.

“Those were pretty minor changes so probably a day or two. Does that sound right Venus?” Jason said.

“Yeah, that sounds about right. Of course, you can always speed that up by eating more food to give the nanobots more resources.” Venus replied, rubbing her still rotund belly as she walked back to the pair.

“Speed it up? By how much?” Celina said as her excitement continued to grow.

“Well I mean if you eat enough I’m sure you could grow them right now if you wanted,” Venus said, who couldn’t help but smile from Celina’s infectious happiness.

“You’re kidding...” Celina said with her mouth agape.

“Nope, trust me I’d know,” Venus replied with a cute giggle as she fondly remembered her days prior.

“Oh my god! Let’s go then!” Celina shouted as she ran off in excitement.

Knowing she was so close to having the boobs she always dreamed of all these years, Celina had never felt more excited in her life. So much so, that the sadness from her plan failing was

completely washed from her mind. At the end of the day, she was still getting the boobs she always wanted. And right now, that's all that mattered to her as she ran out of the lab.

"Wait! Slow down!" Venus screamed to Celina as she waddled as fast as she could with her bulging belly.

Jason, however, stayed behind, lost in his own thoughts. While he was still disappointed, Jason couldn't help but smile at Celina's infectious happiness combined with the hilarious sight of Venus waddling with her cumbersome boobs and belly. Seeing Celina so excited about her 'small' boobs, Jason realized everything wasn't about him and his boob obsession. Instead, all that mattered was that Celina was happy and that would have to be enough for Jason.

So, with a new state of mind, Jason ran off to catch up with the girls.

Celina arrived first at the kitchen and began looking at her options on the food generator. Whatever she picked, it just had to be good so she could eat all of it right now to get her new boobs as soon as possible.

While she was still looking at her options, Venus arrived right behind her, completely out of breath.

"Wait...I'll show you..what...to get," Venus said in between her breaths as she rested her arms on her knees, which she could barely do with her three huge orbs in the way.

"Oh, sorry for ditching you back there, I'm just a little excited if you can't tell," Celina embarrassingly said.

"Yeah you totally didn't make it obvious by sprinting to the kitchen," Venus joked, causing the two to laugh.

"So, what should I get then?" Celina asked Venus who had mostly recovered.

"You want your boobs as soon as possible right?" Venus asked.

"Yes! As soon as possible," Celina confidently responded.

"That's easy then. Get a pregnancy shake." Venus said.

"Pregnancy shake? But isn't that for when I'm pregnant?" Celina asked.

"Technically yes, but it's the most calorie and nutrient-dense food the generator can make. So if you want boobs as quick as possible, get the shake," Venus answered.

“Well, pregnancy shakes it is. How much should I get?” Celina asked, looking at the options on the screen.

“Well, I’ve been drinking 5 gallons” Venus proudly responded.

“5 gallons? Are you serious?” Celina said.

“Yeah well I do have much bigger boobs and babies to feed so that might be a little much for you,” Venus said, blushing as she realized how overkill her suggestion was.

“Yeah no kidding. I think I’ll go with one gallon for now. You think that would be enough?” Celina asked.

“Oh yeah, that should be plenty,” Venus answered.

“Alright then, here goes nothing,” Celina said as she ordered her smoothie and the generator hummed to life.

Soon after, her shake was ready. Celina grabbed the thick, white shake with a glimmer in her eyes. This would be the thing to provide her long-awaited tits.

“Well, bottoms up!” Celina said as she raised the cup to her lips and began to chug.

In mere seconds, Celina demolished the entire shake, which even impressed Venus.

“Wow, someone liked their shake,” Venus said with her eyes wide.

“Ahh... Oh yeah, that’s some good shit right there. It tastes like the best milkshake I’ve ever had,” Celina said as she looked down at the now-empty glass.

“I know! Milkshakes are my favorite human food. That’s why I designed it to taste just like one,” Venus enthusiastically said.

“I think I’m going to be having a lot more of these in the future,” Celina said as she licked her lips clean.

“Hey guys! Sorry, I had to use the restroom real quick,” Jason said as he finally arrived.

“You missed the show. Celina just downed an entire gallon of the pregnancy shake in seconds,” Venus said, causing Celina to become embarrassed.

“It was so good, I couldn’t help myself,” Celina shyly said as she tucked her hair behind her ear.

“Aw man, y’all should have waited for me,” Jason said in disappointment.

“Don’t worry, there will be much more shake chugging in the future. Right, Venus?” Celina said as she looked over to Venus.

GURGLE

Venus's blue eyes went wide a deep gurgle in her stomach.

“Uh oh...” Venus said as she clutched her stomach, which rapidly began to rumble.

“What? What’s wrong?” Jason asked, concerned.

“UUUHHNNNGG!!” Venus moaned as she clutched her boobs, feeling the pressure in her boobs increase.

GURGLE

Jason turned his head from Venus to see Celina also clutch her stomach.

“Oh my god, it’s happening,” Celina exclaimed as she felt her stomach begin to rumble and the pressure inside her chest increase.

“HNNNNGGGG!!!” Venus moaned out again as she dropped to her knees from the pleasure.

“OOHH MY GOD!!” Celina cried out as she followed suit, the pleasure in her chest taking over.

Jason slowly stepped back as he drank in the sight before him. Two of the most beautiful women in the world moaned in pleasure as they clutched their chests which slowly began to expand in their grasp. His dick instantly hardened to full mast at the most glorious sight he had ever seen. And things were only just getting started on Fortuna, the galaxy’s one and only breast-expanding spaceship.
