

Chapter 8:

In the middle of the night, while the ship was quiet as can be, one desperate redhead began working on her magnum opus once again. In the lab, the curvy woman picked up right where she left off in using the nanobots for genetic modification, this time with the power of Jason's wristband.

As the redhead held up the wristband to the monitor, a green unlock icon shined on the screen, eliciting a devious smile from Celina. After unlocking the hidden features of the nanobots, a whole new world of features was revealed that previously were hidden from sight.

Inside the new settings, the green-eyed scientist selected the genetic modification tab and was prompted to select a specimen to modify. From getting her previous nanobot injections, Celina's body scan was already one of the options so she selected herself. After selecting herself, Celina's eyes went wide in amazement at the pure complexity of the application. The new screen showed off every intricate detail of her body down to the tee. It had everything whether it was her measurements, blood type, age, disease risks, and even intelligence level, which he was happy to see was a proud 125 IQ.

Nevertheless, she was getting distracted, so Celina returned to the task at hand, getting herself bigger boobs. So, Celina selected the tab for genetic modification. On the new screen, it showed her body and nothing else. Confused, she tried tapping on her body to see what would happen. When she did, a massive menu of intricate details of her exact genome sequence immediately popped up. Despite being extremely knowledgeable in the field of genetics, Celina was overwhelmed with the amount of information on the screen.

So, she tapped on the conveniently placed question mark in the corner to look for answers. The question mark caused the secret nanobot manual she read previously with Jason to pop up on the screen. Upon further inspection, she saw that the manual was over 200 pages! So, Celina took a deep breath and took the plunge.

After reading through the entire manual, Celina noted down a few main key points. First and most obvious was the risk, which roughly 100 pages of the manual were about. Importantly the manual highlighted the fact that the more genes you alter, the higher chance you have of undesirable mutations occurring. Additionally, Celina was saddened to find out that altering one gene at a time and continuing to alter one until her desired results would be just as dangerous as doing them all at the same time.

Nonetheless, after going over the previous studies conducted by the Valatians, Celina found the maximum amount of changes she could make was 1 major change with some slight minor changes before things quickly started to get dangerous as in most cases 2 major changes led to some serious defects. So, Celina would have to limit her major change to one thing which should be easy since she just wanted to grow her boobs.

Lastly, Celina was further saddened to find out that genetic changes take a long time. Jason for example, had one major change of adjusting his genetic sequence to be compatible with Valatian genetics and it was expected to finish after a month. For Celina, her change would take a similar amount of time to complete if not longer, which made Celina highly disappointed. However, Celina did find that the Valatians conducted some studies where using multiple doses of the same change massively decreased the time to completion to less than a week in some cases. Again, there were some notes of some slight side effects but none that didn't make the risk outweigh getting her boobs even quicker.

So, after educating herself on all the ins and outs of the nanobots, Celina felt prepared to make her changes. So she went back to the main genetic modification menu and selected her body once again and began selecting genes to modify.

Due to the complexity of genes and how their effects overlap, Celina couldn't just search the boob size gene and modify it. Instead, it was more like a puzzle. Celina had to carefully select different genes to alter using her knowledge of genetics and then it would simulate the changes on the body to see the results. So after tinkering with countless combinations, Celina let out a huge sigh of relief and felt satisfied with her results. What she was left with was essentially an extreme version of gigantomastia, or breast hypertrophy where her body would convert any excess resources into breast tissue. This was much like how the nanobots worked. So besides satisfying Celina's ego, what's the point in doing all these dangerous and complicated changes if the nanobots can achieve the same thing?

Well, Celina found out there was one main limitation of the nanobots: power. Each nanobot is constructed with a small battery. The nanobot works until the battery dies then it gets discarded as waste by the body. So for 'small' changes, the nanobots are perfect for the job. But particularly for jobs that require converting massive amounts of material like Celina's goal of growing truly massive boobs, even massive doses of the nanobots would hardly make a dent as Celina got bigger and bigger. So while theoretically, the nanobots can make 'any' change to one's body, they are limited in terms of raw size due to their battery size. And because the body is incredible at adapting to its needs, there's almost no limit on the size Celina could achieve. So that is why these genetic changes are so worth it over using the nanobots.

So with that in mind, Celina went all out. She ramped up the breast hypertrophy as high as it would go, so far that it started to break the simulations, the thought of which sent chills of pleasure throughout Celina's body. Additionally, one of the reasons Celina took so long to achieve her results wasn't due to the complexity of the changes, but because she couldn't help but have a hand down her pants the entire time as she watched her simulated body grow bigger and bigger over time.

"Yessss, bigger and bigger," Celina moaned to herself as she imagined the simulation was herself. By the time she finished her changes, she lost count of how many orgasms she had.

So after countless hours of orgasm-filled science, Celina pressed the button to request her injection on the nanobot machine, thus finishing her masterpiece. In the end, she created an injection with the major change of giving her extreme breast hypertrophy, along with some minor changes like modifications to her heart, lungs, and bone structure to enable her body to tackle the task of maintaining her immense size. Celina even impressed herself by creating a combination that the computer said was highly stable and only had a 10% chance of failing, odds Celina was more than happy with.

So after a minute or so, Celina screamed in joy at hearing the injection get dispensed. Swiftly, she raised the injection and pierced her skin, relishing in the cold fluid coursing in her veins that would give her the body of her dreams. After the injection was finished, Celina danced throughout the lab in celebration. She had done it. Against the odds, Celina had proven her worth and achieved her dreams.

But it wasn't just about her dreams. It was also about Jason's. Celina relished in the thought that very soon her boobs would overtake Venus' and soon Jason couldn't help but become obsessed with her as she became the woman of his dreams, the woman with the biggest boobs in the world. Celina couldn't help but shiver in joy as she imagined the look of pure happiness in Jason's eyes as he looked upon her the way he does Venus now.

And now, all she had to do to become the woman of her own and Jason's dreams was give herself a daily injection of the changes for a week and her body would finally complete its changes.

However, Celina's celebration was abruptly interrupted by getting blinded by the sun coming through the window.

Her heart sank.

It was morning...

Instantly, Celina's mind went to the worst possible outcome. Jason would wake up any second now and Celina would get caught with his wristband. He would find out about her using the dangerous genetic modification abilities of the nanobots that she promised she wouldn't use and force her to undo the changes. Or even worse, Venus would find out. Celina knew that would be the final straw. She already was on thin ice with Venus and was only just now starting to regain some of her trust. But after a stunt like this? Venus would surely kick her off the ship and she would never get the body of her dreams or get to see her beloved Jason ever again.

She simply couldn't allow that. So she rushed off to Jason's room to put his wristband back on his wrist.

Upon arriving at Jason's room, Celina was relieved to find both Venus and Jason were still sound asleep as she could still hear Venus' snoring. However, Celina's heart sank once again...

Of all places to be, her cat Puffles had fallen asleep on top of Venus' heavenly mounds. Honestly, Celina couldn't even blame Puffles because judging by the way he sank into her massive bosom, it was the comfiest spot on the ship. Still, Celina was worried that if she tried to grab Puffles she would wake up Venus. So, Celina tried to carefully pull out Jason's arm from under the massive tit and the cat's weight. This feat she found to be much more challenging than she expected given the cat's weight and the boobs which Celina swore were bigger than just a couple hours prior.

Regardless, due to the softness, Celina was able to slide out Jason's arm without making any disturbance. So, after she slid the wristband back on Jason's wrist, she tucked it back under Venus' endless cleavage. However, on her way out of her cleavage, Celina grazed one of Venus' shot glass-sized nipples with her elbow.

"Mnnnnnggg"

Celina's heart stopped once again.

Venus moaned from being touched and nearly caused Celina to jump out of her skin. She stood completely frozen like a deer caught in headlights with her arm halfway stuck in Venus' cleavage.

After a brief pause, her snores continued once more. Celina let out a quick sigh of relief, pulled out her arm, and tip-toed her way out of the room as fast as humanly possible. However, doing so awoke Puffles, who, noticing his owner, sprung off the plush cushion he slept on to receive some petting and attention. As Celina entered the doorway she turned around to see Puffles headed her way. But before Celina had time to react she saw Venus slowly rousing from her slumber.

"Celina?" Venus asked.

In the blink of an eye Celina snuck into the hallway, leaned against the wall, covered her mouth, and prayed with her eyes closed that Venus didn't catch a glimpse of her.

"Oh, it's just you Puffles," Venus continued,

Celina's heart began beating again as she barely made it out unnoticed. After calming down from her mission impossible, Celina slowly made her way down the hall to her bedroom to not be suspicious and get some much-needed shut-eye.

Meanwhile, Venus was just abruptly awoken by something pressing hard into her breasts. She thought she saw someone standing in the hallway, but after rubbing her eyes all she saw was

Puffles looking back at her on the floor. Quickly, Venus connected the dots of the cat and the sensation of pressing on her boobs. She giggled to herself as she watched the cat look away from her and scurry out into the hallway.

Venus then looked down in admiration at her massive bosom in front of her. To think that her boobs were so big that a 10 lb cat could sleep on them and she would hardly notice was simply amazing to Venus. Furthermore, she also noticed that Jason's arm was right where she left it, as close to her as it could be. She looked over her shoulder to see her master still soundly asleep snuggled up behind her. Venus didn't know how her day could get any better.

Well, there was one thing: her master's dick between her huge tits. So, with a devious smile on her face, Venus carefully slid Jason's arm from between her rotund melons and positioned herself to give Jason his daily morning tittyfuck.

However as she got up Venus noticed her boobs were slightly bigger than normal, which given their already beach ball size was saying a lot. Moreover, she also noticed they felt more full than normal. So out of curiosity, Venus reached to one of her nipples and gave it a study squeeze. Despite not being able to see her nipples, Venus knew it was milk as she could feel tiny droplets fall on her hand.

Venus pieced the puzzle together and figured that after her milk had come in at the mall and throughout the night she had slowly built up a decent amount to make her breasts at least a few inches larger than normal. Now that she paid attention, Venus could swear she could feel them filling up by the second, but it could have just been her imagination.

Nevertheless, as instinctively Venus raised her hand to her mouth to lick it clean, she found herself relishing in the warm slightly sweet taste of her milk. As the sweet creamy flavor lingered on her tongue, Venus got a perfect idea and made a slight change of plans to her normal morning routine...

Jason was sleeping soundly having a pleasant dream. He was at his favorite ice cream shop with Venus and Celina. They sat down at a table together after they ordered their ice cream. For some reason, all of them didn't get ice cream, but milkshakes instead, something Jason found peculiar but tossed aside as a weird dream thing.

Immediately upon sitting down, Celina feveriously began sucking her large milkshake down, like it was the first thing she had to eat in several days. As she drank, her eyes glazed over in drunken pleasure. Venus also chugged her shake, although not as ravenously as Celina but still enjoying it nonetheless.

Jason, witnessing how much Celina and Venus were enjoying their shakes, decided to follow suit and try his milkshake as well. He brought his drink to his lips and immediately spat it out in repulsion. His milkshake was more like a ranch smoothie, with a salty, creamy, savory taste.

"What's wrong? Master doesn't like his shake?" Venus asked, looking over concerned for her master.

"No, It's disgusting," Jason said as he wiped the remaining off from his mouth.

"I'm sorry master! Here, have mine," Venus said as she leaned over to Jason and gave him her shake. "Thanks, Venus," Jason said as his frown turned to a smile from Venus' kind offer.

"Ahhhh!" Celina exclaimed as she let out a deep sigh of satisfaction after finishing her shake. "That was heavenly! How can you not love that Master?" Celina continued.

"More like how can you love that? Something is wrong with mine. It's not even sweet," Jason said as he looked in disgust at his cup which sat on the table.

"Mmm, let me see," Venus said as she took Jason's cup in her hand and raised the straw to her mouth. Jason and Celina patiently waited to see her reaction as they watched the ultra-thick fluid crawl up the transparent straw.

Immediately upon contact with her mouth, Venus's eyes went wide in shock. Jason expected this response and briefly braced for impact in case she spat it out all over him. However, she did quite the opposite. Instead of spitting it out, her suction QUADRUPLLED as she began drinking like her life depended on it, even outdoing Celina with her milkshake.

Both Jason and Celina were caught completely off guard by Venus' animal-like transformation. But their surprise wasn't over yet. Suddenly, Venus' wide eyes rolled into the back of her head and her entire body convulsed in complete orgasmic pleasure, impressively maintaining her extreme vacuum suction all the while.

Jason couldn't understand it. How could she like his drink so much it drove her to the point of an orgasm? Meanwhile, however, seeing the pure bliss Venus was experiencing from drinking her master's drink, Celina began to become extremely jealous. So, she decided to take action.

Out of nowhere, Venus was ripped out of her orgasm-induced bliss as her favorite drink in the world was ripped from her grasp. "HEY!" Venus shouted as her eyes darted over to Celina who instantly began gargling down her master's drink with the same intensity Venus did. And just as Venus did, Celina's eyes quickly rolled into the back of her head as her body trembled in pleasure.

However, before she could get lost in the bliss of drinking the most delectable drink she ever had, Venus quickly reclaimed the drink and continued scarfing it down once more.

Jason watched in silence as his two women fought savagely over his milkshake. He didn't understand why they loved it so much, but he couldn't complain as he enjoyed the show of watching their luscious breasts mash together as they fought for their prized possession. So, he just sat back, grabbed Venus' milkshake, and enjoyed the show.

As Jason lifted the drink to his lips, he was surprised to see how much bigger Venus' straw was than his as it was roughly triple the diameter of his. But again, he disregarded the discrepancy and began to drink. Thankfully, Venus' milkshake was much more to his liking. It was rich, sweet, and creamy beyond compare. Subconsciously, he found himself getting lost in its taste as his eyes fluttered and eventually closed shut as he drank down the sweet heavenly liquor. Slowly but surely the girl's bickering slowly faded away...

Soon, the sound of the girl's bickering was replaced by a subtle yet soothing moaning sound. Curiously, Jason peered his eyes open to find who was moaning. Yet, it wasn't who he found, but what. Upon opening his eyes, he was greeted with the sight of glorious, silky smooth, boob flesh that nearly consumed his entire vision.

Thinking he was still in a dream, Jason brought his hands to latch down on the massive boob. He squeezed them thoroughly as he slid his hands down from the base of the massive boob down to his mouth to coax out more of the delicious warm milk that coated his mouth in its creamy goodness.

"Mnnmmmmm"

His actions were responded to with a much louder and more passionate moan which he interpreted as confirmation of his actions, so he continued, resulting in more irresistible moans

"Mmmnnmm Yess... keep going," the sweet angel-like voice said from above. Jason silently obeyed and increased his pace. Responding to his actions, the boob steadily let out more of its bounty which Jason happily gulped down, easily keeping up with its pace.

"Mmm, someone is hungry this morning," the angelic voice softly said from above. Jason's ears perked up this time as he now recognized it was Venus' voice he was hearing. *"Don't worry, master can have as much as he likes,"* Venus continued as she rolled her head back and forth, relishing in the pleasure of feeding her wonderful master.

Venus couldn't explain why, but feeding her master as she did now was one of the best feelings she had ever felt. Something about the fullness of her breasts, the warm feeling of her warm bosom slowly churning out more milk, and the feeling of providing for someone else filled Venus' heart with warmth. She realized she was quickly falling in love with the idea of lactating more and more as each second passed.

However, sadly her little moment of joy abruptly ended as she felt her milk run out in her right breast. Venus was disappointed she ran out so quickly unlike at the mall where it seemed like her supply would never end. Nevertheless, Jason still mindlessly continued sucking the boob as if sucking it hard enough would cause it to make more milk.

“Hey! I’m all out can’t you see?” Venus laughingly asked Jason, who didn’t respond and continued sucking on her marshmallow breast. Sighing sarcastically with a smile on her face, Venus removed her boob from Jason’s face.

“Hey! Why did you do that?” Jason pouted with a cute frown on his face, causing Venus to giggle. “You’re a little baby aren’t you?” Venus asked with a cute smile on her face as she peered down at her oversized baby.

“For your boobs I am,” Jason responded, with a mischievous smile on his face. Venus was about to respond but was distracted as she felt her milk running down her left breast. It was envious of its twin.

“Ok fine my little baby, at least finish the job,” Venus said as she lifted her other rotund boob, which was slightly bigger than her right at the moment, over to Jason which he greeted happily with a grin ear to ear. Venus shook her head and softly giggled at her ridiculous master, who quickly restarted his task of devouring all of her milk.

“You really love boobies don’t you?” Venus asked. She could barely see Jason over her large beach ball breasts but she could see and feel his head bob up and down in agreement. “Haha, me too,” Venus said as she closed her eyes, laid her head on her right boob, and enjoyed the feeling of releasing her milk once again.

“Master, do you like it when my tits swell with milk?” Venus sexily asked as Jason relentlessly continued to increase his suction strength, his desire for her milk seemingly endless. Once again, Jason tugged Venus’ fat nipple up and down as he immediately agreed. “Oh I know you do, and just think about it, as I have more babies I have, the more my tits will grow bigger and bigger and the more milk they will produce,” Venus said, immediately she felt Jason’s prick spring against her rotund, overly pregnant belly below her.

Feeling his physical response, Venus dawned a devious grin. “How many kids do you want me to have? 8?” Jason nodded his head with her milk gushing in his mouth again. “10?” He nodded again, even harder. “15 kids?” Again, he nodded with even more emphasis. “30!?” This time, he nodded so hard her nipple flung out of his mouth, spewing milk all over Jason’s face. After a brief pause, he reattached himself swiftly and continued chugging.

“What about 100 kids...” Venus slowly said with her sultry voice, which was dripping with lust. This time Jason wasn’t able to nod his head. Instead, he started to jerk in orgasmic pleasure.

Without even being touched, Jason came in his pants from Venus' words alone, with the help of her massive milk jugs of course.

As Jason writhed in pleasure below her milky melons, Venus smiled as she relished in the power of her words. Venus flung her head back with her eyes closed as she ran her hands over the sides of her massive belly. "Imagine how big I would be with 100 babies squirming in my belly. I wouldn't even be able to move with my car-sized belly... I would just sit there helpless as you pleased yourself with my fertile body as you pleased. How I would love that..." Venus said, her voice dripping with lust as her pussy flooded the bed imagining the scene.

"OH! And imagine how big my tits would get!? They would grow so big and fat as they bubbled and brewed my milk to feed my offspring... How much milk do you think I would make? Oh my!" Venus gasped as she envisioned the sight, while Jason finally finished cumming below her and drinking her sweet milk.

"Imagine that, it would have to be GALLONS of milk!" Venus said with emphasis as she raised her arms to stroke her huge white orbs. "Oh, it would be so much more than I made at the mall. How many Gallons do you think I would make for 100 kids? 10 gallons? 20? 50? 100!?" Despite having just cum, Jason was instantly to full mast again at her words imagining just how big her breasts would be when filled with 100 gallons of milk.

"They would be overflowing with milk all the time. I don't know if we would even be able to keep up with how much milk I would be making. My boobs would just keep getting bigger and bigger as my body kept pumping out more and more milk as I had more and more kids," Venus said as she began to feverishly stroke her massive boobs now.

"They would just keep growing until they were even bigger than my belly alone! You could fit your entire body inside. Would you crawl inside my MILES of cleavage and fuck my tits until you passed out?!" Venus moaned as the pleasure in the room climbed higher and higher. "Feeling them grow at your sides as they fill with more and more thick cream. Squeezing your body, coaxing out your delicious cum with their pillowy pressure. Soon I would just be a pair of milky tits. Would you like that master? Would you like it if I became a walking pair of tits just like those videos you used to watch? Hell- would I even be able to walk with my gigantic belly and even bigger tits!?" Venus moaned out as chills went down her spine as she imagined herself getting to that size.

Despite having just cum, Jason was already on the verge of cumming once again. Even though Venus' milk had already run out in her left tit as well, Jason continued ravaging Venus' massive honkers as he awkwardly thrust against Venus' belly. Venus noticed her milk ran out with some slight disappointment and Jason's frustrated thrusts. So, she removed her tit from Jason's greedy mouth, much to his disappointment, but that disappointment was quickly washed away as in one expertly swift motion Venus threw off Jason's cum stained pants and began her signature tittyfuck.

However, before she started, she noticed Jason's belly which bulged out slightly from all the milk he just drank. It looked like it was roughly a gallon of milk she produced overnight. The thought of how much milk she produced just while she slept alone made her pussy squirt for joy. 'Soon, that would be much more' she thought to herself. Snapping out of her daydream she turned her attention back to her needy master at hand.

"I know that's what you like... to see my big - fat - juicy - milky - udders expanding before your very eyes..." Venus said as she devilishly looked up at Jason with her blue fuck-me eyes. "Cum for me master. Cum for me and I'll become your walking pair of tits to fuck and suck whenever your heart desires! Cum for me master! Cum! These tits are yours! This body is yours! Use my enormous tits as your personal cock sleeve! Please bless me with your heavenly cum! Please cum for me master! CUM!!!!!!!"

With that, Jason couldn't hold out any longer. Venus' world-class titty fuck and her succubus-like seduction sent earth-shattering pleasure throughout Jason's core. Time stopped for him as he mindlessly thrust and thrust into Venus' seemingly endless cleavage.

After what felt like an eternity he finally opened his eyes to the wonderful sight of Venus licking up his cum from her tits. Never once for a single moment took her luscious blue eyes off Jason's face.

Jason looked at her with pure amazement. He still couldn't believe it. This woman who has become the woman of his dreams called him master. Although, when it came to sex and her tits, Jason had to admit it was Venus who was the master. The way she knew how to press every right button to get Jason off every time was simply masterful. And it would only get better as she grew sexier and sexier with each passing day. The thought alone made Jason's now empty balls gurggle in anticipation.

After his orgasm subsided, Venus collapsed on top of Jason and snuggled him with her tits.

"Mmm did master enjoy his breakfast - I mean breakfast?" Venus cutely said as she looked up at Jason with her ocean-blue eyes. "I couldn't dream of anything better, although I wish there was more," Jason admitted.

Venus then looked down at her massive mounds in dissatisfaction. "Yeah me too. There wasn't nearly as much as last time. I think there was just so much last time because my boobs were in overdrive since all my milk came in at once. This must be the new normal," Venus said with a pouting frown on her adorable face.

"BUT! I know how to fix that," Venus added, quickly shifting her frown into a devious, hungry smile. She then bounced up off of Jason, causing him to gasp from the massive weight difference.

"Where are you going?" Jason asked as he got up. "The lab," Venus said still wearing her devious smile. She was up to no good, but Jason was all for it if it meant bigger, milkier boobs. So they headed off to the lab together.

But before they were able to leave the room, Venus found herself stumbling and losing her balance. She noticed she kept hitting her legs against her belly which she didn't do as often before today. Curiously, she went over to the mirror to take a look and she instantly confirmed her suspicions.

Her belly grew overnight! She now looked full-term with quadruplets, which made her belly approach exercise ball status. As she looked in the mirror, her devious smile was replaced with a motherly grin as she stroked her perfectly round, blemish-free belly. Now that she paid attention she could feel all 6 of them slightly moving around in their mansion of a belly, a feeling that made her proud.

She had only read the horror stories online of human woman pregnancies and how awful it was from the morning sickness to the mood swings. Venus didn't experience any of them thanks to the special pregnancy injection. Instead, she got to experience only the good side of being pregnant: full, bountiful breasts, the feeling of providing for others, outlandish curves, luscious hair, a giant growing belly, and so much more. All of it warmed her heart in ways she couldn't have ever predicted, and it only made her yearn for more.

"What's the matter?" Jason said as he walked up behind Venus, holding her hips as he kissed her neck. "Oh, nothing. Just appreciating how much bigger I've gotten," Venus said as she stroked her full belly. "Do you like it?" Jason asked. "Do I like it? I love it! In fact, I want more..." she passionately responded.

"Really?" Jason said with some surprise yet unmistakable happiness. "Yes, really, I just know it," she confidently said. "How do you know? You haven't even had your first baby yet," Jason questioned, reasonably.

"Yeah, I know. But still. Something about it just feels right. My body is telling me not only is it ready for more, but it wants more" Venus said as she turned to look Jason in the eyes, looking for approval.

"So, will you give me more master?" Venus said with her puppy dog begging eyes. Jason couldn't even resist for a moment.

"You already know my answer," Jason said with a wide grin, causing Venus to smile as well. He then bent down to give her a deep, love-filled kiss.

After their sweet kiss turned to ravaging each other for 10 more minutes, Jason and Venus, now clothed, made their way to the lab, of course after stopping to get Venus her morning shake along the way. Once Venus sat down at the monitor, she immediately began typing up a storm.

“Jeez, babe. What all are you changing?” Jason asked in shock at the amount of changes she was making. “Let’s just say I’ve been keeping a list of things in my head of things I’ve wanted to change and I think you will like them,” Venus said, once again dawning her devious smile. Jason couldn’t help but get excited at what his boob-obsessed nymphomaniac was planning.

After finalizing her changes, Venus let out a big sigh of satisfaction with her work. “There we go. All done. Want to come see?” Venus asked Jason, who instantly answered yes and headed over to the screen to see Venus’ new changes.

However, as soon as he arrived at the monitor, Venus quickly hid the tab containing all of her changes. “Why did you hide the tab?” Jason disappointingly asked. “Oh right. I’m sorry master. I forgot I wanted my changes to be a surprise for you. But you can look at them if you want,” Venus said, with some dejection that she couldn’t hide.

Jason felt bad and immediately regretted making her feel guilty. “No, it’s okay. I like surprises,” Jason said with a comforting smile that brought back a smile on Venus’ face. “Ok good! I promise you master, it will be worth the wait,” Venus said as she sexily looked up at her master, which made Jason want to plow her face on the spot. But, he got distracted by seeing himself on the monitor.

“Why am I up there?” Jason inquisitively asked. “These are the changes I made for you master,” Venus said as she guiltily looked away from Jason. Her reaction particularly piqued Jason’s interest so he inspected the proposed changes on the monitor.

Immediately, Jason’s eyes almost bulged out of his head as he noticed the most notable, and largest change.

“HOLY SHIT MY DICK IS MASSIVE!”

“Yeah... maybe I went a little overboard,” Venus admitted as she shyly tucked her platinum hair behind her ear. Jason didn’t even register what Venus said due to pure shock as he looked at the PYTHON that lay between his legs. The thing was at least a foot in length and as thick as Jason’s forearm. Nearly reaching down to his knee, it was by far the biggest dick of all time. Or so Jason thought.

“Wait a minute,” Jason said as he leaned closer to the monitor and selected the “enable erection” option. Jason’s jaw dropped.

“WHAT THE FUCK!” was all Jason could muster as he now looked at the 2-foot monster which rose nearly to his chin and was thicker than his bicep. And now that it was raised, Jason now

got to look at the EVEN MORE MASSIVE BALLS that sat just below the 2-foot pole. His balls were at least the size of two coconuts and looked like they would be too big for a horse. Jason couldn't even imagine trying to walk with those in the way let alone with the penis portion as well.

Jason then looked over in shock at the maker of the changes. "Venus, are you serious!?" Jason said with a concerned look on his face. Venus nodded in shame as she covered her face with her sleeves in embarrassment. Jason was about to say something but was interrupted by something unexpected

Venus' face of embarrassment changed to one of pure dread in an instant as if she realized something. Then her expression changed to one of pure panic as she suddenly thrust herself at Jason's feet.

"PLEASE MASTER FORGIVE ME!" Venus said with tears streaming down her face as she clung to Jason's feet for dear life. "I'm so sorry master let my desires get the better of me and I only did what I wanted. You deserve so much better master!" Venus cried out as Jason felt her tears drip on his feet.

Jason was stunned by her response but before he was able to console her, she suddenly got up and plugged herself into the terminal. A screen popped up that displayed Venus' mental controls.

"Here, press this button to deactivate me. You and Celina can complete the mission without me," Venus said to Jason as tears continued to fall off her face and land on her bosom, pooling in the middle of her cleavage.

"WOAH! WOAH! WOAH! Slow down! What are you even saying?? Deactivate you??" Jason said as she sprinted over to her. He knelt and took her hands in his. He looked up at her but she refused to look back at him out of shame.

"Correct. I have failed my task and I don't deserve to be a part of this mission any longer," Venus said as she raised her arm to press her deactivate button.

Immediately, Jason grabbed her arm as hard as he could to prevent her from making such a disastrous mistake.

"VENUS! WHAT ARE YOU DOING STOP!" Jason protested as she resisted him. After hearing him say stop, however, her arm went weak and she gave up. She collapsed on Jason and began crying even harder than before.

"Why did you tell me to stop!?" Venus said between her panicked breaths. "BECAUSE! Why would I ever want to deactivate you? I love you, Venus!" Jason responded as he cupped her face with his hands, forcing her to look at him with her tear-filled eyes.

"How could you love me? I've failed my one and only task. I'm a failure,"

"What are you even talking about? I don't understand Venus! Why are you saying these terrible things all of a sudden?!"

"I did the one thing I promised myself not to do. Choose me over you," Venus said, her voice filled with regret.

"What do you mean?" Jason asked, but then looked back to the monitor and connected the dots. "Is this all over the changes you wanted to make to my dick? Is that it?" Jason asked. Venus simply nodded in silent guilt.

"Venus, it's ok," Jason softly said as he hugged Venus. "Everyone makes mistakes Venus. There's no need to overact over such a little thing," Jason said in her ear as they continued their embrace. Venus then pushed him back.

"No! It's not ok! You are my everything! My goal and my only purpose is to serve you! And just then, I threw that all away by serving myself before you! So I have failed as your servant, and no longer deserve to call you my master,"

Jason then took a deep breath and let out his heart, "Venus, you aren't just my servant. You are also my everything. I couldn't imagine my life without you. So you think I'm going to let you throw away the best thing that has ever happened to me just because you want something for yourself!? No! I want you to have everything you desire as much as you do for me."

Jason then got up and pressed the dispense button on the nanobot machine.

"What are you doing?" Venus asked, with a concerned look on her face.

"Giving the most important person in my life what they want and what they deserve," Jason said as he injected the cold fluid into his arms, feeling it course through his veins.

Venus began to cry again. "Why are you doing this? I don't deserve this!" Venus said as she continued to lament. Jason headed back over to her to comfort her again.

"Yes, Yes you do Venus. Do you know why you deserve it?" Jason calmly asked. She shook her head in silence.

"Because I love you,"

Hearing these words, Venus broke down again for one last time. All Jason did was sit there and comfort her as it felt like the right thing to do. It was then that Jason realized that Venus might

be more human than most people he knew. And maybe those pregnancy hormones were finally starting to kick in.

Nevertheless, after she calmed down she finally spoke up, "You must think I'm a freak now..." Venus said as she looked down in embarrassment. "You? A Freak? Are you kidding me? You saw my porn collection and you think you are the freak for wanting me to have a giant dick? If anything you are the sane one," Jason said, getting a slight giggle out of Venus.

"Earlier I was just in shock is all. It wasn't like I didn't like the changes," Jason said, getting Venus to immediately perk up. "You liked the changes?" she nervously asked. "I mean, yeah. Every guy wants a bigger dick. Bigger is better right?" Jason responded truthfully. Venus couldn't help but nod in agreement.

"I will say though. I am still a bit concerned for you. Am I not going to tear you apart with that, that thing?" Jason said looking to Venus for her response. "No, I wouldn't worry about that. The pregnancy injection makes it safe for me to handle almost any size, trust me," Venus assuredly said.

"Wait, how do you know that?" Jason questioned. Venus instantly turned nervous after this question.

"Well, you aren't the only one that likes big assets on their partners," Venus said as she strutted over to one of the drawers and pulled out a MASSIVE foot-and-a-half-long dildo out of nowhere. Jason's eyes went wide.

"Let's just say I had to find ways to keep myself occupied on this lonely ship," Venus embarrassingly said as she put back her old 'toy'.

"Okay, I believe you now. And sorry - but do you just have those lying around the ship?" Jason asked. Venus again guilty nodded. "Wow, no wonder you wanted me to have a bigger dick," Jason said as he pondered if she was enjoying herself while they had sex or if it was just an act.

"Why didn't you just tell me my dick wasn't big enough for you before now?" Jason curiously asked, feeling a little insecure about his average size.

"You are big enough! Or - well, I guess that's a lie. I don't know," Venus stuttered as she struggled to say what she wanted to. "It's ok, you can be honest with me. I promise I won't be mad," Jason responded, giving Venus more confidence.

"Okay, if I'm being honest I do enjoy having sex with you. It's just I want more of you so I can feel even better. I know, it's so selfish for me to say that. That's why I was so scared to bring it up before and honestly, earlier I was so excited that I didn't even realize I made your changes until it was too late" Venus said, nervously fiddling with her hands.

“Well next time you ever want anything, you can have it. And don’t feel bad about wanting stuff for yourself next time okay? You are more than just a servant and I hope you know that,” Jason said. Venus nodded again and brought Jason in for a deep kiss. After a while, they slowly parted and looked deep into each other's eyes.

“Thank you, master, for everything,” Venus sweetly said. “Of course, anything for you. Now, why don’t you take your injection for your changes and we go have some fun in the pool? Sound good?” Jason asked as he held Venus' hips to his, as well as he could of course with her massive belly and tits in the way.

“Read my mind,” Venus said as she gave Jason a peck on the lips.

After injecting herself with her new nanobot injection, they headed to the pool hand in hand.
