

## Chapter 9: Pool Party

After getting their new injections, Venus and her beloved master headed toward the kitchen. While Jason had his fill of Venus' milk earlier, Venus was absolutely starving. At her current size, she needed roughly 20 gallons of her prized pregnancy shake and 2 gallons of water every day to feed her 6 hungry babies. But since she started lactating, Venus found herself getting much more thirsty than before, even more so after feeding Jason this morning.

So, Venus happily waddled her way to the food generator. Usually, she started her day with a 5-gallon shake but this morning was special. It was special because she just had her new nanobot injection. As soon as her first injection ended, which took her breasts to the size of beachballs, Venus had been scheming up what to do for her next injection. And let's just say she was very excited about this new injection. That's why she wanted to consume as much food as possible so the nanobots had plenty of resources to fuel her surprise growth. So she ordered a 10-gallon shake. Hearing the machine hum to life, Venus happily waddled away with a big smile, teeming with excitement.

While her shake was being made, Venus made her way over to the sink to quench her thirst. Previously, she enjoyed sticking her head under the faucet and filling up that way. However, due to her yoga ball belly and beach ball tits, she quickly realized she couldn't fit close enough to the counter to reach the faucet. As a result, she recently had Jason install an extendable hose so she could easily get her fill. So, she grabbed the extendable faucet and began flooding the Sahara desert which was her mouth.

Jason just watched in pure awe as Venus filled herself with gulp, after gulp, after gulp. In fact, she was drinking so fast that Jason could visibly see Venus' belly grow inch by inch. The sight of her growing belly, which pushed up her massive boobs even further into her field of view, made Jason's dick instantly twitch in response.

After chugging water for what felt like an eternity, Venus let out a loud gasp for air. After catching her breath she looked over to Jason and noticed his gaze. She also couldn't help but notice the growing bulge in his pants. Knowing her master was enjoying the show, she decided to up the theatrics.

Slowly, sensually, Venus started rubbing her massive rotund belly, eliciting sweet moans that made Jason's eyes go wide.

"Mmm, Master, look how big I've gotten," Venus said as she groped her fertile curves. "Oh, but wait. I'm not done yet," she continued as she made her way to the food generator, which had just finished her shake.

The massive container weighed over 80 pounds. But thanks to her bionic-enhanced body, 80 pounds was hardly much for Venus. After picking up the massive container with both hands, Venus raised the lid to her mouth and began to chug the thick mixture with all her might. All the

while, Venus kept her devious, fuck-me, blue eyes locked with Jason's. Soon after, the sight was too much to handle for Jason so he made his way behind his beloved servant. He then set to work fondling her tit with one hand and massaging her belly with the other. Immediately, this elicited a sexual response from Venus, who closed her eyes and moaned as she chugged.

Soon, Venus was lost in her own world. Knowing what each gulp was going to do to her body sent chills down her spine and encouraged her to chug even faster. That, along with Jason's masterful massage, led to Venus quickly flooding her pants with her sweet love juices. Meanwhile, Jason was getting more and more turned on as he felt each gulp from Venus slightly push his hand back further and further away from her giant belly to the point where almost half of it was visible from behind her!

Sadly, however, Venus was nearing the end of her shake. But before she emptied the container, she stopped, leaving about half a gallon left in the container. Meanwhile, Jason was getting very excited and swiftly pulled down his pants to expose his raging erection. Then, he began to slip down Venus' pants. But before he could take them off, he was surprised by Venus grabbing his hand to stop him.

"Wait Master, I really want to do it in the pool this time. Is that ok?" Venus pleaded, turning around and batting her eyes.

Despite being her master, Jason couldn't help but admit that the combination of her body, velvety voice, and puppy eyes made her get anything she wanted. Jason sensed that she seemed to be self-aware of this but Jason didn't really care as long as she was happy and he got what he wanted as well.

"Ugh, fineeee. I'll wait," Jason said as he reluctantly pulled his pants back over his angry member. Venus immediately responded with a giddy fit and a devious smile.

"Yay! Thank you so much, Master. You are the best master ever!" Venus said as she planted kisses all over her master's face, which caused Jason to blush. "Also. Can you please drink the rest of this" Venus added as she handed Jason the rest of her shake.

"Mmm I'm still pretty full but I guess I could try some. Why do you want me to?" Jason curiously asked, as he looked at Venus who had the look of a child that just stole a cookie from the cookie jar. She didn't say anything, she just looked. Looked right at Jason's crotch.

"Oh, I see now. In that case, bottoms up!" Jason announced. As he finished off the rest of the thick shake, Venus again became giddy with excitement. She then ran over to Jason and grabbed his arm, leading, or rather pulling, Jason to the pool room.

And so our excited, growth-primed couple was about to reach the pool room. However, they passed by the dorms on their way. As they passed by, Jason's mind couldn't help but get reminded by Celina. Now that he thought about it, he hadn't spent much time with her at all.

After all, she got to the ship, passed out from her growth, and spent the entire last week sleeping. They tried to go to the mall together, but Jason unintentionally ended up spending most of that time with Venus after Celina left on her own.

Regardless of how excited he was to be with Venus, the guilt in his heart stopped him as they passed Celina's room.

"Wait," Jason said as he stopped, letting go of Venus' hand in the process. Venus was completely caught off guard by this as she was dreaming of her upcoming growth and sex with her master.

"What's wrong Master?"

"I'm going to see if Celina wants to join us," Jason answered as he began opening the door to Celina's room.

Venus' eyes shot wide open. "NO!" She screamed in her head. She wanted her master all to herself. She was getting along better with Celina recently, but honestly, she was looking forward to this special time with just her and her master. It wasn't that she hated Celina, it was more that she didn't want to have to share him. Not yet at least. On top of that, she had never had sex with another person other than Jason, let alone another girl.

All of this, convinced Venus to intervene, which she did by reaching out and grabbing Jason's hand. Or rather, she tried to grab his hand but he had already entered Celina's room while Venus hesitated! Venus' heart immediately sank into her massive pregnant stomach.

Jason made his way into Celina's room quietly, unaware of Venus' distress. Upon entering the room, Jason immediately noticed that Celina was still fast asleep. So he quietly tip-toed his way to her bedside.

Right before he reached to wake Celina from her slumber, Venus suddenly tapped him on the shoulder. Jason whipped his head around, eyes wide in surprise. He was greeted by the sight of Venus cutely shaking her head and nodding her head towards the door, indicating to leave. Then, to support her argument, Venus brought up her hands from her sides, grazed her massive baby maker, and squished together her pillow-like breasts with her elbows to further increase their apparent size. This caused her blue eyes to be the only visible part of her face from Jason's point of view, the rest obscured by the obscene curves.

Jason was caught between a rock and a hard place, or rather a soft place. Would he choose just Venus or include Celina as well? While he was erring on the side of including Celina, before he could make a decision, he was swiftly led out of the room by Venus.

"What is it, Venus?" Jason asked as they exited the room.

“Master, I wanted it to be just me and you,” Venus pleaded, like a kid in a candy store.

“I know Venus but we just spent the whole last week together. Think about it, I haven’t gotten to spend time with Celina hardly at all since went into her coma. And, on another note, you have to get used to sharing me with her, you understand that right?” Jason reasoned.

Venus then ran up to Jason and hugged Jason’s arm, sending it deep down her cavern of cleavage.

“Yes I know Master but please just this one last time can it just be me and you before I have to share you? Plus, she’s asleep right now anyways so we should let her sleep and she can join next time,” Venus cutely responded, using her puppy eyes and deep cleavage again to strengthen her argument.

Again, Venus knew how to win any argument. Jason could only sigh in acknowledgment of his defeat.

“Ugh, fine. Just this last time,” Jason said.

Immediately, Venus’ face lit up like a star at night. She quietly clapped in celebration, sending her massive curves jiggling and bouncing every which way. Jason couldn’t help but let a subtle smile show on his face.

Soon, the lovely pair reached the magnificent pool room. The pool was an Olympic-sized swimming pool with a 20 ft deep end, a relaxing beach entry, and a 20-person hot tub (yes the ship is massive). Safe to say, there was plenty of room for fun. Immediately upon entering the room, both of their restraints vanished. The two began tearing into each other, making out so aggressively a bystander would have thought they were fighting each other. Shuffling and squirming all over each other, they inched closer and closer to the water.

Out of the blue, Venus shoved Jason straight into the pool. Jason gasped in surprise as he was overwhelmed by the brisk water, soaking his clothes.

“HEY!,” Jason shouted in playful anger.

“Don’t worry master, I’m right behind you,” Venus devilishly said as she slowly revealed her curves.

Jason stood in the pool with a horny smile on his face. Venus slowly lifted her tarp of a shirt revealing her massive belly. The fabric, despite being so large, was strained to the limit as it crossed over the high ridge of Venus’ taut orb. But after some resistance, the tight cloth made its way over her expanse, soon encountering the next obstacles.

Once she reached the bottom of her bosom, Venus took her sweet precious time raising her shirt over her breasts. With the shirt not even halfway up her boobs, the bottom portion of her boobs was already larger than her face and much larger than most women's boobs combined. Once she reached halfway, Venus looked down with a devious smile and began to shimmy her chest back and forth. The weight of the orbs alone caused them to free themselves inch by inch until they plopped free with a satisfying recoil.

Jason couldn't help but feel his soaked pants jerk in response to the sight above him. The fertile god stood before him with the epitome of a fertile belly, gargantuan milk tanks, and a river flowing between her legs. Jason was getting antsy now and began to undress in the pool.

Meanwhile, Venus continued her performance by taking her top over her head, causing her luscious platinum hair to fall on her shoulders. Dropping her shirt to her side, the nude goddess strutted her way towards the edge of the pool.

Right before she lowered herself in, she let out a surprising gasp and immediately threw her hands to her belly. Jason's eyes went to her stomach and quickly realized the cause of her reaction.

"Mmm, the babies want their daddy too don't they?" Venus said as she massaged her belly, their subtle bumps of movement visible on the globe's surface. Feeling his erection straining to its absolute limit, Jason's restraint vanished.

"Oh, do they now?" Jason added as he snatched Venus' hand and pulled her into the pool. Squealing in delight as she fell onto him, her massive bosom landed on Jason's face, letting out a squirt of milk from the sudden increase in pressure.

As they settled into the water, the couple embraced one another once again and shortly after intertwined their tongues. Minute by minute, they discovered each other's mouths for the hundredth time this week. All the while, Jason rubbed his raging member against Venus' smooth tummy.

Parting with a string of saliva connecting their lips, they gasped for air as lust consumed them both.

"Mmm master please fuck me. I need you so bad," Venus said, the desperation thick as molasses in her voice. Slowly but expertly, she rubbed her hand down his length under the water. Taking the initiative, Jason turned her around and pushed her against the pool wall.

Venus braced herself against the pool wall with her arms, causing her breasts to plump up from the pressure at their sides. Then she turned her head around and shimmied her firm cheeks to tease her beloved. Jason swiftly attached himself to her waist and inserted himself into her juicy folds, eliciting a cute moan from the servant's mouth.

Slowly backing up his hips, he then drove to the hilt, eliciting an even louder moan from the recipient. He repeated this process a few more times, with a devious smile on his face.

“Nnnnggg master stop teasing me, go faster please!” Venus desperately moaned.

Jason happily obliged and increased his pace. Each thrust sent ripples through the waters which bounced off of Venus’ ungodly curves. They had never tried sex in the pool before but Venus always wanted to try it after seeing videos of people doing it online. And she couldn’t help but admit she loved it. The best part about it was the lovely feeling of weightlessness. While she loved her tits and belly more than anyone, she couldn’t help but admit that it felt so good to lighten up the load on her cyber-enhanced back.

However, out of the blue, Jason stopped. Venus thought he was teasing her again, so she turned her head around with an angry smirk on her face. Instantly, her smirk was replaced with a look of shock as Jason stood behind her with a panicked look on his face.

“Master! What’s wrong?” Venus cried out.

“It’s happening,” was all Jason could muster as his transformation began.

Jason shot his head upwards towards the ceiling, intensely moaning from the pleasure coursing through his veins. Meanwhile, in his body, the nanobots were hard at work converting Venus’ milk and the thick pregnancy shake to pure penis meat. And now, their changes were taking effect. Soon after, Venus could feel the changes happening too.

Venus was confused by what her master said at first but without moving his body, Venus could feel him moving inside of her. Her jaw dropped in shock and joy. He was growing! Swiftly, Venus set to work, using the wall as leverage, she lowered and raised herself onto his expanding dick while Jason stood there frozen from the pleasure.

With each bounce of Venus’ ass, Jason drove deeper and deeper into her. Responding to her bouncing, Jason mindlessly began thrusting into her. With each thrust, Venus’ cries of pleasure grew louder and louder as her lovely folds were spread further and further by the thickening mass. Inch after inch, Jason’s cock extended deeper and deeper into his lover. After only a minute, Jason had already doubled in length and girth and his pleasure only continued to rise.

What Venus didn’t notice was Jason’s testicles had matched its counterpart if not even more. Like filling up a water balloon, the cum factories that began cherry-sized visibly expanded and grew to produce more and more potent baby-making cream. Unconsciously Jason had to spread his legs as the seed sacks demanded more and more space. As more and more resources were pumped into his nuts by the nanobots, they soon reached the size of softballs and only continued to engorge as they filled with more and more baby batter.

Meanwhile, Venus' moans were only getting louder. Jason's penis was now long enough that it reached all the way to her cervix. Now each thrust of her master's cock pounded her directly into her G-spot. Each and every time, fireworks of pleasure went off in her head. As a result of the fireworks show, Venus was slowly drowning in pleasure as her eyes rolled into the back of her head and drool started to slowly drip out the side of her endlessly moaning mouth.

Meanwhile, Jason's eyes were also rolling back into his head. The feeling of his veins expanding to supply more blood, his testicles fattening to produce more thick sperm, and his rod expanding further with each pulse of his heart was making Jason go mad. Each centimeter of his dick shot the pleasure of a whole dick straight into Jason's brain. After some time, the sensation was slowly becoming too much for Jason to handle and he suddenly blacked out.

After a few seconds, the stars of pleasure in Venus' brain slowly faded away as Jason's pounding ceased. When Venus finally became aware again she noticed a heavy weight on her back. She turned her head around to see Jason's passed-out body lying on her back and slowly falling into the water. Soon after, Jason's head plunged under the water as he slipped off completely.

"MASTER!!!!!" Venus screamed at the top of her lungs.

Immediately Venus' master safety protocol self-activated. The master safety protocol was a program in her brain designed to reprioritize all of her tasks to her master's safety when he was in danger. So now despite all the pleasure she was experiencing, Venus was completely focused. Swiftly, she spun her gravid body around in the water and reached down into the water to grab her master's hand. Then she raised him up out of the water and slowly pulled him to the ledge. Each step was painfully slow for Venus as not only was she not very hydrodynamic, but she also had to pull her master along with her.

After about 30 seconds, Venus finally reached the ledge. She then carefully pushed her master up the ledge so that his top half was safely out of the water. Letting out a few coughs, Venus sighed in relief as she heard him begin to breathe. Venus wanted to catch her breath but found herself coming to tears as she looked at her master's comatose body.

She completely forgot that the pleasure of growing from the nanobots was too much for humans to handle, which caused Celina to go into a coma last time. She felt so stupid and careless for forgetting that the same thing wouldn't happen to her master. And in the pool of all places? Venus realized her feelings once again might've gotten the best of her.

But before she could sulk any longer, Venus suddenly felt her hips get tightly grasped. She stood there speechless. She looked over to see her master was gone. She then turned around to see not her master, but something else. His eyes were completely glazed over, like a man possessed.

The beast, what was Jason, had only one task. Fuck. The beast was attempting to complete this task but was struggling to get its massive foot and half-long, 4-inch wide appendage into Venus' tight pussy under the water.

Venus could feel him moving around and was becoming extremely worried that her master wasn't saying anything.

"Master? Are youuuUUU—" Venus attempted to say but suddenly gasped as she felt him enter her depths.

After a few failed attempts, the head of the massive cock finally punched its way through with a satisfying pop. The beast let out a small grin. Then, the beast began breeding. Rearing his hips back until the head of his penis was just at the edge of her juicy pussy, the beast latched onto her hips and thrust as hard as he possibly could. Instantly, he penetrated her deepest depths causing her to go silent in shock of the pleasure.

From that one thrust alone, which because of the unbelievable length was able to reach behind her cervix to her ultra g spot, Venus' vision briefly faded to black from the pleasure. Before she could recover, she was penetrated again, and again, and again. Soon, the beast reached an otherworldly pace of fucking. Each half second, the entire foot and a half-length slid out of Venus' tight pussy and immediately filled it again to the brim.

Clearly, both sides were enjoying the moment as the echoey pool room became filled with high-pitched cries of pleasure and deep groans. Water splashed all around the pair as they fucked like no one had ever fucked before. Soon, the aggressive thrusts of the beast began to pin Venus against the wall of the pool. Feeling the pressure build against her belly's surface, she used her arms once again to push back from the wall and brace herself from the impact of each mind-blowing thrust.

With each thrust, the beast couldn't help but wince in pleasure as almost every few seconds Venus' was experiencing an orgasm, each time causing her pussy to clamp down onto the massive cock inside. Each squeeze coerced the dick inside to let out its cum and fill it to the brim.

Soon, the beast couldn't help but feel an impending orgasm. Spreading his legs to accommodate for the cantaloupe-sized testicles below, he could feel churning up the biggest load in human history. The veins all over the surface of the dick and balls had grown to be thick as pencils as they prepared for the impending explosion.

With one last final thrust, the beast thrust with all his might. Groaning at the top of his lungs he unleashed the flood deep into Venus. Despite being drowned in pleasure, even Venus could feel the gravity of the incoming load. As the thick cum crawled up the mast, it expanded the cock even further to almost 5 inches in thickness, stretching Venus out even further than she had ever been before.

Then the euphoria hit. Glob after glob pounded against the walls of Venus' depths. The immense thickness of the shaft and Venus' godly tightness prevented any droplet from having a chance of escaping. Twitching constantly, the massive balls continued to pump out seemingly endless amounts of thick, potent sperm which quickly within two bursts had filled all of the available space in Venus' vagina. But that wasn't stopping anything. Venus' malleable flesh soon expanded and grew to house more and more of the potent, thick sperm. Cup after cup shot down his length, slowly but surely filling Venus more and more.

Because of Venus' already massive size, it was hard to tell her belly was steadily rising further and further from the massive load. But as the pressure increased, the 6 nearly full-term babies inside Venus' taut belly couldn't help but squirm from the commotion nearby, causing ripples and bumps from their motion to appear all over her skin under the water.

Finally, after a full minute of constant orgasm, the beast's orgasm slowed to a halt. A full gallon of the thick baby batter was now stored in Venus and she absolutely loved the feeling. All sex they had prior immediately became obsolete to the feeling of bliss Venus was currently experiencing being filled to the brim. The beast's new empowered dick reached places she never thought possible. On top of that, Venus couldn't help but feel a sense of satisfaction being filled so much. It was like her body was telling her that this was its purpose, this was meant to be.

Before Venus could bask in the afterglow much longer, the beast began his thrusting again. Despite unleashing an inhuman load, the beast was not even close to being satisfied. Instead, from below the water's surface, you could hear his balls rumbling and churning up another gargantuan load. With each new thrust, the beast pierced through the thick cum inside Venus until he bottomed out once again behind her cervix, the tight wall holding its ground surprisingly well.

The combination of Venus' constant orgasming pussy that squeezed and coerced his dick and the thick sperm lubricating the effortless thrust quickly caused the beast to increase his pace to his previous pace.

Meanwhile, Venus was in pure heaven as orgasm after orgasm shot through her body. Her eyes had slowly begun to roll back into her head and drool now began dripping onto her expansive cleavage. Speaking of which, Venus suddenly snapped out of her trance after feeling a

### *GURGLE*

Venus' eyes immediately whipped down to her expansive bosom as she could feel the familiar sensation begin once again as the pressure began to mount in her breasts. She had been so caught up in her own pleasure that she completely forgot she had taken her next injection to grow her boobs just earlier. Upon realization, she immediately let out a loud squeal in excitement as she braced herself for her favorite thing in the world: bigger boobs!

As Venus was bracing herself against the pool wall, her arms pressed against the sides of her tits causing them to pump up to the height of her nose and make a cavern of cleavage that extended all the way down to just past her elbows. As the rumbling commenced, this soon changed. As much as Venus wanted to watch, she couldn't help but throw back her head from the combined ecstasy of her growth and the mind-altering fucking happening behind her.

The massive white orbs soon began their march between Venus' arms as they dominated more and more space. Inch after inch they expanded, rising higher and pushing against Venus' arms as they grew vertically and horizontally. However, because of Venus' arms, most of their growth was funneled directly forward as they stretched further and further down Venus' arms length.

Billions of nanobots were hard at work converting her gallons of pregnancy shake into pure raw breast meat. However, because of Venus' particular change this time, most of their time was spent growing and expanding her milk glands. Like a network of thick, deep tree roots her milk glands expanded and multiplied, priming her for even higher production than ever before. Suddenly,

*GASP!*

Venus couldn't help but gasp in shock as her extremely thick, sensitive nipples had already consumed all the space between her arms and reached the cold pool wall, causing lighting bolts of pleasure to shoot through Venus' core. The fist-sized nipples, red hot from their expanded growth, continued to press harder and harder into the wall causing Venus to experience even more growth.

Despite reaching her previous yoga ball size she achieved at the mall, her tit meat still demanded more space. But now, pressed against Venus' arms, belly, and the pool wall, the only direction left to grow was up. Rising like a timelapse of dough in an oven, the marshmallow-like mass inflated higher and higher.

Although it wasn't obvious, most of their growth now wasn't from her breasts growing larger, but instead filling larger. Ever since the growth began, Venus' production ramped to its maximum speed causing Venus' nipples to steadily let out a consistent stream of milk. But now, being pressed from nearly all sides, the increase in pressure led to milk shooting out of Venus' thick spouts hard against the wall. On top of that, her production only continued to climb higher and higher than it had ever been before. It was hard to tell how much milk was coming out because her nipples were under the water, but slowly but surely all of the water around the couple had turned pure white from the sheer amount of creamy goodness.

Despite being blocked partially by the wall, the girth of her nipples allowed for nearly a gallon of milk to escape per minute, but it simply wasn't enough. The normally extremely supple milkers now had filled to the brim, causing the surface to get strung taught and thick veins to spread across the surface. Yet still, the production of milk continued causing the milk masses to

continue their march higher and higher. Soon, despite having her head thrown back, Venus could begin to see her melons at the bottom of her vision. She glanced down, still orgasming nearly every other second, and watched in awe as they dominated more and more space above her head.

But soon, the surface of her orbs began to turn an angry red hue from the excess pressure. This caused Venus began to wince in pain from all the pressure inside her milk factories. This time paled in comparison to her experience at the mall. She desperately needed release. So much so that she snapped out of her rollercoaster of ecstasy and entirely focused on trying to relieve herself. She desperately clawed at her dense, milk-filled mammaries, but no matter how far she reached, she couldn't even reach her dinner plate-sized areola. In an attempt to squeeze out more, she used all her strength and pressed into her sides. Instead of pressing inwards, the density prevented hardly any movement whatsoever. Venus was getting extremely desperate now.

"Nggg-Master! Please-ngg- HELP ME!!" Venus cried out to her master, who relentlessly continued pounding into her juicy depths. The pleasure consuming his mind prevented him from hearing any cry no matter how loud.

What Venus didn't notice was that as her bosom filled up higher and higher, her nipples rose further and further up the pool wall. Then in an instant, her nipples crested the edge of the pool wall and stuck out into the air once more. But now that all the milk wasn't damped by the water, the pure immensity of the pressure and amount of flow was fully realized.

Shooting out with the pressure of a small fire hydrant, a straight burst of milk launched across the pool directly impacting the nearby room wall. The feeling of relief was unlike anything Venus had ever experienced before. Screaming with all her might, her mind went completely numb as she succumbed to the feeling of utter, raw euphoria.

\*\*\*\*\*

Meanwhile, Celina was slowly stirring away in her bed. She had been restless that night. She was so excited about her upcoming growth that she hardly got any sleep that night.

*GRRR*

Groggy Celina looked down at the source of the disturbance: her stomach. Clearly the nanobots needed more materials to continue their progress in modifying her genetics. Rubbing her hangry stomach, she reluctantly got up from her bed and scrambled her way to the kitchen.

Once arrived, she quickly popped a caffeine pill which did wonders, and immediately started to wake Celina up. She then made her way to the food generator to get her meal. Normally, she would be in the mood for a good hearty American breakfast. But she couldn't help but agree

with Venus that the pregnancy shake was becoming her favorite food, not just because of the taste of course.

Normally she was used to ordering her usual 1 gallon. But this time, she wanted to go all out and give her nanobots as much resources as they needed. So she stepped up her game and ordered a hefty 5-gallon shake. Once it was ready, Celina heaved the hefty jug up to her lips, closed her eyes, and began to chug.

Soon, her arms began to give out from holding the dense liquid. When she opened her eyes she was surprised to see she already drank over half of the shake, leading to a noticeable bump on her midsection. After catching her breath, she smiled in satisfaction.

But out of nowhere, Celina heard a terrifying scream echo down the halls of the ship. Celina immediately recognized it as Venus and quickly left the kitchen to search for Venus who sounded like she desperately needed help.

She first checked Venus' room. Empty. 'Where is she? And where's Jason?' Celina thought to herself. Heading down the other direction of the hallway, Celina's ears perked up at the sound of water splashing and loud grunting.

'The pool?' Celina thought to herself as she made her way to the pool room.

Upon arriving, her jaw dropped to the floor.

The sight before her had to be the most erotic thing she had witnessed in her entire life. First of all, Venus was massive! Even bigger than she was at the mall which was already bigger than Celina could have ever imagined. Celina could see Venus was pressing into the sides of her gigantic breasts, each sticking out over 2 feet from her body, sending out two thick streams of milk that landed nearly 5 feet away from her from all the pressure. As a result, a large pool of milk on the side of the pool continued to grow in size and started to leak into the pool water. Meanwhile, the beast was relentlessly ravaging Venus from behind her. Propped up by her massive 3-foot diameter belly (which you couldn't see under the milky water), the beast had perfect access to thrust into the deepest depths of Venus.

The beast's loud grunts and the splashing of his thrust filled the entire pool room. Now that Celina paid attention to him, Jason was different. His eyes glazed over with a feral look in his eyes. Celina was scared by it but also couldn't help but get turned on by the sight as she imagined she was in Venus' shoes. Speaking of Venus, Celina noted that Venus barely seemed conscious. But Celina couldn't help but envy the look on her face. Her eyes were barely opened and her mouth was wide open with the biggest smile, all while sticking her tongue out causing drool to drip off her perfect face. A look of pure heaven.

Witnessing this magnificent display, unconsciously Celina reached a hand to her lower parts, finding her panties to be already drenched in excitement. She slowly lowered herself into the

shallow beach entry of the pool just a couple of feet from the horny pair. They were too lost in their pleasure to notice her and Celina was getting too horny to care either. Placing one hand on her breast, the other down her pants, she began to pleasure herself. Keeping her eyes locked on Venus, she began to enter her own world as she imagined her own breasts growing just as big as Venus'. No. bigger. Much bigger and much more milkier...

Meanwhile, the beast was nearing another massive climax. Feeling his balls churn and swell in excitement, he quickened his speed even faster. With all he had in him, he thrust his entire foot and a half-length down her drenched, constantly tightening pussy. Quickly, the pleasure surmounted to its peak as the beast felt his cock swell and expand as the thick load traveled down its length. Just as the load reached the tip, the beast latched onto Venus' hips as hard as he could. Thrusting as deep as possible, he unleashed the gargantuan load.

Immediately, Venus' whole body went completely ridged as ecstasy filled her to the max. Her milk continued to shoot out at an inhumane speed, despite already pumping out at least 10 gallons of milk. An audible glug could be heard each second as each consecutive burst of cum, 5 times larger than any man's entire orgasm, traveled down the beast's length and lodged itself inside Venus' ever-expanding pussy. Clamped down with the force of iron, not a single drop escaped from her constantly quivering pussy.

For a whole minute straight, both the beast's and Venus' bodies were completely stiff, twitching every second as their continuous orgasm reverberated through their core. Meanwhile, the sight was too much for Celina to handle as she too joined the pair in their united orgasm.

As the beast's orgasm finally waivered, he took massive gasps for air after depositing nearly 2 gallons of baby batter in the past 15 minutes. Looking down at his prized possession even the beast could tell she was spent. Venus, eyes still occasionally twitching, laid completely limp on top of her belly and massive bosom which rested against the edge of the pool, still continuously leaking out milk from her fist-sized nipples, although at a much slower pace at this point.

Suddenly, the beast's attention was drawn away from the slab of fertile meat in front of him to a loud moan from nearby. The beast looked up to see Celina, pressuring herself at the edge of the pool at an extreme pace. He could see she was experiencing another orgasm of her own as she loudly moaned again, echoing throughout the pool room.

Hearing these moans, the beast felt his still rock-hard member twitch inside of Venus. Heading her mating call, the beast unsheathed his sword, causing the thick cum to slowly leak into the pool water from Venus' pussy. As he did, the massive length slapped against his midsection, reaching all the way up to his chest.

"OH MY GOD!" Celina shouted in pure shock.

The beast simply let out a slight grin and strutted through the water towards his prey.

“Nononono-no. There’s- there’s no way. It won’t fit,” Celina pleaded, her eyes never leaving the mesmerizing penis which pulsed and twitched, primed for more breeding.

Completely unaware of her desperate pleas, the beast latched onto his prize, swiftly pulling her towards him and ripping off her top. It all happened so fast, that Celina barely had time to react. Despite being afraid of what it could do, her body couldn't help but beg for the massive baby maker in front of it.

Grabbing the massive fist-sized head, the beast lowered it under the water to Celina's needy pussy. Positioning it right against her moist folds, the beast attempted to thrust into it. Not fitting the giant cock slipped on the surface and launched up out of the water high into the air. Grunting in frustration the beast lowered his cock once again.

"I told you it won't flllllllllllllEEEEETTT!" Celina attempted to say as he screamed at the top of her lungs as the entire foot-and-a-half length bottomed out against her cervix.

Never, had Celina ever imagined she could be stretched so wide. Initially, her vision went white from the pain. But slowly, the pregnancy injection was beginning its magic on Celina's body. Within seconds, her body adjusted and stretched to occupy the giant cock. Just as the pain began to fade, the beast had begun his breeding.

With the pain gone, Celina felt the full pleasure of her entire pussy, every last inch of it, being stimulated and stretched to the max. She looked down to see that his penis was so large that she could see the massive head poking through his stomach. It was beyond anything Celina had ever felt in her life and she absolutely loved it. As the beast quickened his pace, Celina couldn't help but feel her first of many more orgasms rocket through her body, clamping down on the huge penis inside of her.

Grabbing her tiny waist, Jason reached his inhuman 2-thrust-per-second speed. Looking down at his new prey he couldn't help but smile. This one wasn't nearly as curvy as his other one, but this one was sexy in her own way. Her perky D-cup breasts bounced and splashed against the water with each thrust, giving lovely eye candy to the beast. He then looked up to see her lovely, wet crimson hair thrashing about from the wild movement. Then he reached her delicious green apple eyes laid inside her beautiful freckled face.

Her eyes were glazed over as another orgasm coursed through her veins, but they both had the same look in their eyes: need. They needed each other and they needed more and more until they couldn't get enough. Immediately, Jason lunged down and locked his lips with hers, embracing in the most feral kiss anyone had ever seen.

As they intertwined their lips and continued their desperate kiss, Jason could feel his orgasm building once again. He then broke off their desperate kiss, a long line of their saliva still connecting their lips. Celina couldn't help but let out a whimper in sadness as their soft lips parted.

"I love you, Celina!" Jason loudly said.

"I love you too Jason!" Celina screamed out in response.

That was all he needed to hear to send him over the edge. Gurgling once more, the massive cantaloupe-sized testicles rose up to release their load. Quickly reaching down to lock their lips once more, Jason kissed Celina and tightly wrapped his arms around Celina as he buried his length to the hilt. Feeling her pussy widen even further as the gooey cum traveled down the now 5-inch thick cock, Celina couldn't help but moan passionately into Jason's mouth from the feeling of ecstasy.

Shortly after, the first rope slammed into Celina's depths, causing stars to appear in her eyes as she became consumed with pleasure. Each pump of the creamy cum filled Celina more and more by the second. Her belly grew in size to contain the precious sperm that continued to fill her beyond her craziest imagination. Soon, Jason could feel her belly pressed against his midsection. The realization of his cum causing her to inflate that large caused him to cum even harder!

Twitch and pulsing with each burst, his cock continued to pump Celina fuller and fuller. Again, after another full minute of constant cumming his brains out, Jason fell limp on Celina's also limp body in the shallow water. Mostly unconscious both of them lay there gasping for air. Feeling his dick finally start to go limp Jason let out a satisfied sigh, closed his eyes, and fell asleep with a joyful smile on his face.
